#### 1500 AIRPLANES A YEAR IS BASIS OF MADDEN PLAN

House Appropriations' Head Criticizes Present Program as "Wasteful"

ASKS MORE BUILDING. LESS EXPERIMENTING

\$7.500,000 Yearly Increase in Budget and Force of 1500 Officers Favored

WASHINGTON, Oct. 12 (A)-The Army and Navy were charged by Martin B. Madden (R.), Illinois, chairman of the House Appropriations Committee, with squandering millions of dollars "in a purposeless, meaningless, endless experi-mental orgy" in technical aircraft

development.

Testifying before the President's air board, which resumed hearings after a recess of several days, Mr. Madden declared technical develop-ment of aviation could no longer be "safely left" to the two military services if the United States was to take its place "among the countries of the world in the sir."

of the world in the air."

If credit is to be given witnesses "who have preceded me," he asserted, the experimental and development work conducted by the Army and Navy since the war "has been preductive of very little, if any, advance" toward a plan which might be accepted by Congress.

"You have been told by men who should know that, with few exceptions, no real steps have been made." he said.

#### Quotes Inquiry Testimony

Citing the testimony by Maj.-Gen.
Mason M. Patrick, chief of the Army
Air Service, that 262 pursuit airplanes purchased by the army had
been found deficient in vision requirements, Mr. Madden said he had
"heard nothing of a charge of criminal negligence, but that borders on
criminal waste."

"Think of buying 262 pursuit airplanes that a pilot has difficulty in seeing out of," he exclaimed, Failure of the army and navy to spend their money "intelligently" in the Air Service, he declared, is not unique, as "aimiliar extravagant, set-nowhere as "similar extravagant, get-nowhere programs are being carried on in tank development, artillery develop-ment, chemical warfare and ammuni-

Mr. Madden submitted a plan for mr. Madden submitted a plan for promoting army and navy aviation, at a cost of \$87,500,000, which, smong other things, would provide for discontinuance of all arenopautical engineering and design work by the two military services, with the abolition of the naval aircraft factory at Philadelphia and the arms.

Before the dawn a group of the arms. tory at Philadelphia and the army engineering aircraft division.

Opposes Government Manufacturing

'Fifteen hundred new airplanes of various designs, at \$20,000 each, could be purchased annually, amounting in the aggregate to \$30,-

#### Cost of Personnel

"Then ground service men for each airplane, which is more than ample to properly care for the airplanes, at \$1500 each per enlisted man, which think would be a fair average to cover his army pay, his clothing, sub-sistence, etc., would cost \$22,500,000. "Fifteen hundred officers, or one officer for each 10 enlisted men, or (Continued on Page 2. Column 2)

#### Cedar Rapids Churches Copy New Testament

By the Associated Press
Cedar Rapids, Ia., Oct. 12
HURCHES of Cedar Rapids have completed sheir task of copying the New Testament, pro-dueing, what officials of the Ministerial Association say, is the only book of its kind in the world.

A total 7959 persons copied one verse each and signed their names to their work. The copying was done in a week in a uniform manner. The verses will be bound into a huge book and exhibited at religious gatherings throughout North America.

#### BOWDOIN NOW AT WISCASSET

Great Throng Welcomes the MacMillan Expedition on Its Return Home

WISCASSET, Me., Oct. 12 (A)-The MacMillan arctic expedition is home again. The schooner Bowdoin and the steamer Peary arrived in the home waters of Wiscasset at 10:20 o'clock this morning from Monhegan Island, where they had been held by

Before the dawn a group collected on the wharf at Monhegan where the Peary lay, some boarding that ship, while more of the 40 welcomers from

Opposes Government Manufacturing

He would place all designing and construction of airplanes in the hands of private manufacturers, with the responsibility of performance under design, and with the military services furnishing only the specifications desired.

Fredicating his recommendation upon present expenditure of \$55,000,000 a year for army and navy aviation, he said that working backward from this sum, in other words, trying to determine just how much aviation of a military character might be indulged in for this expenditure, "I suggest the following:

"Fifteen hundred new airplanes of Under Spread of Canyas"

Wiscasset were transferred to the anchored Bowdoin by dory and launch.

At 5:20 this morning the Peary backed from the dock through the north passage between Smutty Nose and Monhegan. With Capt. George F. Steele of Roxbury, Mass., on the bridge, the ship maneuvered almost her own length with sea breaking against the racks on either hand, until her nose pointed to the open water. Then it was "full speed ahead" that the telegraph rang in the engine room, and the last leg of the ovogáge was under way.

Under Spread of Canyas

Under Spread of Canvas A group collected on the after deck of the Peary saw the Bowdoin round the southern point of Mana Island which forms the west end of the har-bor, under a spread of white canvas. On the journey to the shore the steamer, made top-heavy by the three naval amphibian planes perched on her hurricane deck, took white combers in rapid succession over her

Sight of the Bowdoin had been lost by the Peary a few miles out of Mon-hegan and the latter ship after gaining the shelter of the Shaepscot River dropped anchor to await her com-panion. While there, lying in smooth and sunny waters, flags and stream-ors were run up as the ship entered Wiscasset.

Advantage also was taken of the stop to cut in two emergency gasoline generators in place of disabled electrical generators. These emergency generators had been carried through-out the trip but were not needed until these few miles from home.

#### Bowdoln Sighted

Half an hour after the Peary anchored the Bowdoin was sighted. Commander MacMillan's ship took the lead and the two steamed slowly up the Sheepscot to the Wiscasset dock where throngs awaited them. Small pleasure toots accompanied them the last mile or two of the way, while the whistles of both ships replied frequently to greetings waved or shouted from the banks and from the wharf and shore as the craft circled the harbor. Commander MacMillan and mem-

bers of his party were greeted at the landing and escorted to the old custom house steps near-by where brief welcoming exercises were held. Samuel J. Sewall extended a wel-come in behalf of the town and it was as effective as if he were a native son.
He introduced Gov. Ralph O.

Brewster, who exclaimed:
"I hope I can get back to my col-lege days long enough to lead three cheers for Mac."

Commander MacMillan said he did not have time to give a running ac-count of his experiences, but would be back in Wiscasset very soon for that purpose. The party accom-panied Governor Brewster and other visitors to Portland for a luncheon that was a postponement of the din-ner planned for last Saturday eve-

## Tiny Aircraft Race 50 Miles in Mitchel Field Competition

Scientific American Trophy Won by 16.7-Horsepower Design Built by John Powell of Detroit and Piloted by Gerald Dack of Dayton, O. .

"Flivver" Type Efficient The event was one of the preludes to the Pulitzer trophy speed classic of the national air races, which was postponed from Saturday on account of weather conditions, and was a proof of the speed and efficiency of "fliver" aircraft.

Dormoy special monoplane, took third, at 52:22 miles an hour. The only other plane to finish was piloted by H. C. Mummert, of Hammondsrt, N. Y., at an average speed of

#### Interesting Aircraft Designs Displayed at Mitchel Field

NEW YORK, Oct. 12 (Special)— During the lull in the program of flying events at Mitchel Field a very valuable opportunity of closely view-ing the many and varied airplanes which have collected on the airdrome has been provided, giving an impression of a fine showing of civilian airplanes of interesting types.

Many of these machines have, of course, come from Detroit at the conclusion of the Ford reliability tour.

Peabody Museum Sets Aside Room Where Lectures which ended in a perfect score of points being made by 11 of the 17 entrants. The uninitiated have found some apparent difficulty in correctly understanding the true outcome of the Ford reliability airplane tour. There has seemed to be an opinion that the event held last week with Detroit as a starting point was an airplane race, whereas nothing could be farther from the truth.

Reliability the Object With the sole object of the tour being to prove that civilian airplanes being to prove that civilian airplanes today are capable of perfect reliability in cross-country flying for commercial purposes, the 17 machines started out from Detroit on a week's tour of 11 mid-western cities, covering a distance in all of no less than 1900 miles.

Definite times of arrival and departure were arranged for each "port of call." Thus, speed did not in any way enter into the rules of the tour, reliability, economy and ability

tour, reliability, economy and ability to keep up the schedule being the sole factors entering into the rules, sole factors entering into the rules, and thus any and every airplane which completed the week's flying and returned to Detroit within a prescribed period of time was properly to be called a winner of the tour and received in compensation a sum of money sufficient to pay all running expenses during the week away from Detroit.

Reliability vs. Speed

In contrast to the air races now being held at Mitchel Field, the Ford-reliability tour has definitely been responsible for advancing the prog-ress of commercial and civilian aviation. While the air races certainly have their value for progress, nevertheless in no way can they be considered promotive of commercial

mercial needs can already be pro-

vided for.

In view of this, a very marked difference in general is apparent be-tween the airplans which lined Ford Airport, Detroit, and those filling the hangars of Mitchel Field.

Versions of Same Design

After a re-check, Mr. Dack's average speed was officially corrected as 76.13 miles per hour.

E. Dormoy, also of Dayton, in his similar design, took part in the Ford airplane. This airplane, or one of similar design, took part in the Ford reliability tour, but an inspection of the airplane which flew in certain of the races here reveals the fact that entirely different wings have been fitted to nominally the same cirplane. The question, therefore, arises as to which of the two versions of the same design is most satisfactory for the purpose for satisfactory for the purpose for which the airplane was originally intended

The Mercury Jr. was designed as a feeder-line mail airplane, to carry on the work of the minor mail routes, in conjunction with the transcontinental air mail route. With its pilot, who had to conform to almost a jockey weight standard so that his craft might leave the ground.

#### FRENCH STILL SEEK SOLUTION OF DEBT ISSUE

Payment Issue Not to Be Shelved-Economic Education to Be Improved

By SISLEY HUDDLESTON

By Special Cable . PARIS, Oct. 12-The conversations are to continue. That is the principal affirmation of the French ministerial council, which has examined the reoort of Joseph Caillaux, Finance Minister, on the Washington discussions.
There is to be no rupture. The problem will not be shelved for five years.
It is unlikely that another important
mission will visit America at an early
date, but nevertheless contact will
he mentained in some form or other be maintained in some form or other. Chiefly through the ordinary diplomatic channels will the pourpariers proceed. When the time is rise, but not until, another public attempt will be made to find a suitable solution.

In the meantime the economic edu-

In the meantime the economic edu-In the meantime the economic edu-cation of the two peoples must, in the opinion of the members of the mission, be improved. It was hardly to be expected that the Prime Minis-ter, Paul Painlevé, and his ministers would immediately declare them-selves for or against the provisional arrangement suggested at the last moment by America. M. Caillaux was careful not to recommend it, but only submit it. He takes no responsibility in this respect.

Hostility Against Proposal

In such circumstances, having regard to the general feeling of hostility against undertaking the oner-Piloted by Gerald Dack of Dayton, O.

MITCHEL FIELD, N. Y., Oct. 12
(P)—Gerald Dack, of Dayton, O., won the Scientific American trophy race for light air craft, attaining a speed of 76.41 miles an hour in a tiny biplane propelled by a 16.7 horsepower Bristol Cherub motor. The airplane was built and owned by John Powell of Detroit.

Second place was won by Clyde Emerick, also of Dayton, in a baby monoplane, whih was equipped with a motorcycle engine capable of 19.85 horsepower and which fiew at the rate of 67.55 miles an hour.

The event was one of the prelides.

troduction of new factors, such as financial exigencies and diplomatic pressure, but M. Lamoureux frankly declares that the proposal had only one purpose, namely the masking of the failure and permitting departure in an atmosphere of cordiality.

The Cabinet naturally desires to proceed cautiously, and will examine the questions raised in the subsequent councils. Long studies by experts and many deliberations, says M. Galilaux, will precede the deci-M. Galllaux, will precede the deci-

Conversations Begun Too Late M. Caillaux complains that the conversations have begun too late. The debts have been allowed to accumulate with interest in snowball fash-ion. It is impossible for France to neglect its financial duties. Nonpayment would be bankruptcy, and France would be ruined. He criticized the bad bargain in the purchase of American war stocks. M. Calilaux is anxious not to commit himself too far, but the general significance of all the declarations on the side is that before there can be

this side is that before there can be the hope of any accord, there must be a much better understanding by the public of the problems.

## NATIONS IN AGREEMENT

ON GERMAN CONDITIONS FOR ENTRY INTO LEAGUE

Allies Produce Solution Which Luther and Stresemann Believe Will Satisfy Public Opinion-Notable Progress Reported

FRIENDLY RELATIONS WITH RUSSIA ARE SAFEGUARDED IN THE NEW PLAN

Locarno Delegates Hopefully Predict Success for the Security Pact Conference-League Text to Be Whipped Into Final Shape

LOCARNO, Switzerland, Oct. 12 (AP)-Agreement was practically reached today on the conditions of Germany's entry into the League of Nations, and the delegates to the security conference now hopefully predict the success of the conference.

The Allies have produced a solution of the German League membership question which Dr. Luther and Dr. Stresemann believe will satisfy German public opinion and at the same time

safeguard the friendly relations of

the Reich with Russia.

An official communiqué, issued after today's session, said: "Clarifications and precisions re-quested by the German delegation in the conference on the question of the League brought about a general

exchange of views and explanations. This exchange resulted in progress of the work of the conference toward the adoption of a satisfactory solu-Today's session was the most ex-Today's session was the most exciting since the inauguration of the conference, for Dr. Luther and Dr. Stresemann insisted on more than the Allies were willing to accord on the League issue. They were told flatly by all that it was a case of accepting what was prepared, or adjournment of the conference. The German leaders held a whispered consultation, and then announced their adherence to the Allies' ideas. The conference adjourned until to-

#### PAGEANT OF NATIONS FEATURE OF "COLUMBUS DAY" PROGRAM

Parades of Boston Police and of Italian Societies Reviewed by State and City Officials-Pan-American Groups of Special Interest

NEW HAVEN. Conn., Oct. 12 (Special) — Lectures and exhibits intended to familiarize children with the wild life of the State and to encourage them to protect it, have been arranged by the Peabody Museum of Yale University, which will enter upon a program of educational co-operation with the schools of New Haven when it opens in December.

Prof. Richard S. Lull, director of the museum, said today that a room in the building had been set aside for the purpose. The museum has an extensive collection of the birds native to Connecticut and of the animals dangerous to them. Other exhibits show the harmful results produced by illegal methods of securing birds or their plumage for commercial purposes.

Miss Eleanore W. Parmelee, who grouped Italian societies marked Special recognition was made of Boston's celebration of "Columbus representatives of the Pan-American Day" today.

Approximately 1300 officers and parade, which was reviewed at City in national costumes of their own or parade, which was reviewed at City I national costumes of their own or State House by Governor Fuller, and at the Common by Herbert C. Wilson, police commissioner, and a large group of invited guests, former members of the department, and friends. Mounted units, traffic officers, motorcycle groups, patrolinen. Tremont streets, entering the Common, along Boylston and Tremont streets, entering the Common. cers, motorcycle groups, patrolmen, machine gun units, made up the

M. Greist of New Haven, used the land as a deer park. In commenting upon the project Dean Graves said:

Public Celebrations Association.

The pageant was prepared in the form of a series of tableaux in which representatives of Pan-American race was held at Dorchester, and tountries, as well as European and many special events were held in Asiatic nations joined with those of surrounding cities.

What Dr. Luther appears to fear is that he may go too far ahead of public opinion in making concessions, for German opinion is opposed to Germany entering the League except on condition that it be entirely exempted from the obligations of Article XVI, including the pressity of leading its travitory for necessity of lending its territory for the passage of troops of members of the League in case of war. The German Government, which unfortunately is a coalition with divided ranks, is impeded by the Na-tionalists who are opposed to the pact altogether, and the critics say it would be well if Dr. Luther showed less apprehension, for that would strengthen his position, since the popular tendency in Germany is to follow a statesman of determina-

Poles Not Pressing Case The League question remains the most difficult to settle, since it is impossible to alter the Covenant without the consent of the League. parade.

This afternoon, under the dramatic direction of Miss Joy Higgins of Community Service, a pageant entitled munity Service, a pageant entitled munity Spirits of the Nations" was presented at Parkman Bandstand as part of the celebration arranged under the auspices of the Citizens' and national guard under the auspices of the Citizens' Public Celebrations Association.

The major address was made at the castern Europe, the major address was made at the point of the presented at Parkman Bandstand as a colorful group, with many is practically agreed upon, the French having consented to a distinction between the political questions first to be dealt with by arbitration courts and others by conciliation boards, the entire procedure to pivot on the League, and the sanctions against refusal to arbitrate.

Also the Poles are no longer press-ing for a special guarantee for their

Other questions, such as the evacuation of Cologne, have fallen into the background, but it is certain the Allies could make a generous gesture and promise to fix an early date for the evacuation of Cologne by which the Luther-Stresemann task would be greatly facilitated, for then they would have something to show the German public.

## TO RESPECT THE LAW

By Special Cable ROME, Oct. 12-Following the dis solution of the Masonic lodges of Florence, the Grand Master of

Italian Freemasonry issued a circular inviting all the lodges in Italy to suspend their meetings and all other activities until further orders. After referring to the violent pres campaign against Freemasonry, cul minating in the publication of an alleged secret Masonic circular, which was a forgery, the Grand Master says that the Fascisti have most tenaciously accused and still accuse Italian Freemasonry of being in the service of "foreigners." The Grand Master rejects strongly

this accusation, adding that Italian Freemasonry is national in character. In face, however, of the present situation, he appealed to the Gov-ernment for the strict protection to which Freemasons were entitled by law. One of the main fundamentals on which Freemasonry is based, he said, was respect of the laws of the state and Freemasons, therefore will respect also the new law against secret societies.

NEW COPPER COMPANY FORMED result of that policy.

Quoting Admiral Moffett as having spondence)—A new copper company, told the committee that the navy's experimental expenditures have resulted in placing it "on a parity, if not in advance, of other nations in corporation on file.

ington Conference is that France is ignorant of America. The second les son is that America is ignorant of France. Too many travelers obtained a superficial, often an entirely false view of the French Nation.

The members of the French mis-sion pay tributes to the sincerity of the American negotiators. They also recognize the courage and energy of M. Caillaux, apparently regarding themselves as mere observers and reserving the right to criticize and combat whatever is now sought to be done. It is thought that the jour-ney was not wasted, since it shows France means to be faithful to its signature. It further has resulted in the acceptance of certain axioms, notably that payment is to be limited to capacity, and that a safeguarding clause and a transfer clause are necessary to enable the subsequent examination of French

As a setoff to the government bill, the Central Industrial Committee ship of France and America which has been unimpaired for 125 years will not suffer. M. Auriol asks the result of an inquiry, in which it is claimed that the eighthour day has resulted in the reduction of ideas. M.

Deutscat helicuse that it is of successional production per day and in the pro-Dausset believes that it is of su-preme importance that the negotia-tions should contine without haste but uninterruptedly. M. Chapsal also insists that a break would be grave.
Although the personal position of
M. Caillaux has not been strengthened, he does not appear to have lost prestige, and if he can now present a sound financial program, he may remain in office. It is recognized that he did his best, but it is also recognized that serious situation has to be faced, and the coming months may determine the whole future of French finances.

Whole of the Debt Problem Still in "Stage of Study."

PARIS, Oct. 12 (A)-M. Caillaux, newly returned from his debt fund-

examined at a ministerial council a week from Tuesday, after the convention of the Radical Party at Nice, which M. Caillaux is to address, has

On leaving the Elysée palace, M. Caillaux emphasized the fact that the whole of the inter-allied debts problem was still in the "stage of study," and notably the projected provisional agreement with the United States, which had not been decided upon one

selves so impressed with the importance of a decision, acceptance or refusal, that they decided that all possible consequences ought to be thoroughly weighed before replying to

Ministerial Council

This decision cannot officially be made before Oct. 20, the date of the next ministerial council at Elysee Continuance of the negotiations with the United States is emphasized in the official communique, which also says: "M. Caillaux made a complete and detailed presentation of the pourparlers with America, and at the same time of the results obtained. The members of the Government are unantmous in thanking the delega-tion and the Finance Minister for the devotion with which they accom-plished their mission. The questions raised concerning the whole of the interallied debts will be examined at

### COMBINED EXPORTS OF WHEAT 90 P. C. AHEAD OF PREWAR DAYS

Commerce Department Says 1920-24 Period Shows 594,-000,000 Bushels, Against 811,000,000 From 1909-13 -Russia Big Contributor

16.800.000 barrels or 53 per cent of Special from Monitor Bureau WASHINGTON, Oct. 12-The combined exports of wheat from the chief exporting countries of the total. world were 90 per cent above pre-war shipments for the postwar period of 1920-1924, according to statistics made public by the De-partment of Commerce. The so-called "primary surplus" countries included in the survey are the United included in the survey are the United

year period, as compared with 311,-000,000 bushels during the period from 1909-1913. Russia, formerly a large wheat exporting country, contributed 158,-000,000 bushels to this total. Exports from the five chief sources today are therefore more than 25 per cent greater than shipments during the prewar period from the same countries with Russia included, it is pointed out by the foodstuffs division

of the Commerce Department.

It is also noted that the United States has been shipping to Europe

90 Per Cent Went to Europe Other outstanding developments in the wheat exportation situation are outlined by the Commerce Depart-

the total. Canada exported 8,834,-000 barrels or 28 per cent of the Of the total pre-war shipments the United States supplied 58 per cent and Canada 21 per cent, in-dicating that Canada has since the war been making greater strides in capturing world flour markets than has the United States.

Europe took 55 per cent of the total exports of flour during the 1920-24, Asia and North America 15 States, Canada, Argentina, Australia per cent and Africa 9 per cent. The same relative figures pre-war were Europe 43 per cent, Asia 19 per cent, North America 17 per cent and South 594,000,000 bushels during the four America 13 per cent

Canada Makes Gains Argentina and India have been just barely holding their own in the shipments of figur, their combined exports during the past five years being less than 5 per cent over the pre-war period. On the other hand the combined shipments from United States and Canada are now fully 80 per cent greater than those pre-war. per cent greater than those pre-war, Canada, however, having made con-siderable larger gains than the

40 per cent greater. To South America, 25 per cent less flour was shipped.

Other outstanding developments in the wheat exportation situation are outlined by the Commerce Department report as follows:

Over 90 per cent of the world's wheat shipments pre-war went to Europe; during the last five years these exports averaged 87 per cent of the total.

To... every grand division more wheat was exported during the last five years than pra-war; to Europe, 54,000,000 bushels more; to Asia, 22,000,000; and to Africa, 6,000,000. Much larger quantities of wheat were exported to the United Kingdom, Italy, Belgium, and Japan during 1920-24, than during 1909-13.

The average amount of flour exports was over 31,500,000 bushels of the strong competition from Polish milling by-products in Baltic markets and the efforts to increase exports to the proposition and telegrams was over 31,500,000 barrels or 60 per cent more than pre-war. Of this amount the United States shipped

### PROFIT ON CORN SOUGHT IN IOWA

Growers' Association Plans Campaign to Win Market for Bumper Crop

DES MOINES, Ia., Oct. 12 (Special)—With the maturing of a bumper crop of corn, Iowa farmers It is also noted that the United States has been shipping to Europe a relatively smaller proportion of the total wheat exports than during prewar years, while Canada has increased, its exports to European countries.

Canada, however, having made considerable larger gains than the United States. The total shipments of flour to Europe during 1920-24 were 100 per cent greater than become fore 1914; to Africa 140 per cent, to Growers' Association, with head-quarters in Des Moines. This organization was formed last year and i has branches in Illinois, Missouri, Kansas and Nebraska.

warehouse act, in order that orderly marketing of the large crop may re-

sult in a profit to the grower.
"Last year when the price of corn was above \$1 lows farmers had very little corn to sell." says Paul B. Talbot, agricultural journalist and leader of the corn growers' movement, "although it cost them much to grow what they harvested as though it were a bumper crop. The result was they lost about \$100,000,-000 on an investment of \$300,000,000.

Stabilizing Prices "This year these same farmers due to harvest a crop better than the five-year average, are facing a price-trend that indicates little bet-ter than 50 cents a bushel on the farm in Jowa when the new corn is in the crib. At 50 cents a bushel, and an average of 40 bushels to the acre, which is a very fair estimate for this year. Iowa corn growers stand to collect little better than \$200,000,000 from their 11,000,000 acres of corn, on which they have invested another \$300,000,000. The result will be the loss of another \$100,000,000. This is

due to market manipulation. "A fair price for corn is absolutely tal to farmers and business men. It is folly to expect this sort of thing to go on indefinitely as it has for years. The corn growers' announce-ment to hold corn for a price is a challenge to both business men and farmers, and should result in a move ment throughout the entire corn belt to stabilize the price this year at a figure that represents cost of pro-duction plus a reasonable profit."

#### VIRGINIANS BEGIN NEW ENGLAND TOUR

Southern Group Visits Bridgeport Factories

BRIDGEPORT, Conn., Oct. 12 (P) government and economics of imperative importance in China's present West Virginia business men. as -The 30 Virginia, North Carolina and West Virginia business men, as guests of the New England-Virginia intersectional committee, began their tour of New England from here today. The southern group arrived yesterday afternoon and were given their first welcome banquet at the Brooklawn Country Club last night.

Accompanied by officers of the local Chamber of Commerce, the delegation made a two-hour survey of the harbor and industrial plants of the darbor and industrial plants of the city. Then the southern delegation left in motor busses, escorted by state police on motorcycles, for Waterbury, where they had luncheon. The afternoon schedule cails for a short stay at Waterbury, after which New Haven will be visited.

by state police on motorcycles, for Waterbury, where they had luncheon. The afternoon schedule cails for a short stay at Waterbury, after which New Haven will be visited.

The party was greeted here last night, at a banquet, by Gov. John H. Trumbull in a speech of welcome to the State and by prominent business men from all over New England.

C. Y. Shill is one of the two students who recently prepared a manifest, subsequently approved by the National Chimese Students' Alliance and which calls upon foreign powers interested in China virtually to withing the well-respond to the State and by prominent business men from all over New England.

to believe that the true test of New England's progress is whether or not New England is supporting more people in greater comfort today than was the case 10, 20 or 50 years ago. This question can be answered only in the affirmative. Nevertheless, it is a matter open to question whether New England is today making the most of all of her varied opportunities.

New England has the capital necessary for productive investment, the skilled labor for successful production, and an abundance of plant and equipment. I hope the New England conference will find opportunity to consider whether the greatest possible use is being made of all these assets and facilities.

tics.

If the New England Conference can direct public attention to the cesential facts in New England's situation, and stimulate in the minds of business men intelligent thought upon them, nothing but good can result. I hope that the response to your invitations to the meeting at Worcester will be most gratifying to all concerned. If the Federal Reserve Bank can assist your committee in its study of New England problems, such information as we have will gladly be placed at your disposal.

be C. H. Dietrich, chairman of the freight claim division of the American Railway Association; Everett Morss, president of the Simplex Wire and Cable Company and former president of the Boston Chamber of Commerce, and William C. Fitch, traffic manager of the Southern Pacific Company, San Francisco.

On Oct. 15 C. B. Baldwin, traffic manager of the United Shoe Machinery Corporation will preside over an open forum on claim prevention. Later in the day seven specific industries will be studied at meetings presided over by representatives of the industries.

In the afternoon C. M. MacDonaid, freight claims agent of the Boston

reight claims agent of the Boston & Maine Railroad, will discuss prompt settlement of claims; H. E. Snyder, assistant freight claims agent of the Lehigh Valley Railroad will speak on shippers' contribution to increased efficiency in freight transportation and C. H. Dietrich transportation, and C. H. Dietrich will consider present outstanding claim causes and their remedies.

The conference represents a com-mon meeting ground of shippers and carriers, and the general and frank discussion which is expected to pre-vall is intended to clarify joint prob-lems and further the co-operative growth of New England industry.

#### MUNICIPAL RAILWAY TO CEASE OPERATION

Exeter, Hampton and Amesbury Line Quits This Week

HAMPTON, N. H., Oct. 12 (Special) -The first and only experiment in municipal ownership and operation of a railroad in New Hampshire will come to a close this week when and hungry and be hasn't any home!"
the Exeter, Hampton & Amesbury
The little fellow said with a tone
Pellway cosess operation. Financial of regret, "I can't. I got dogs." Railway ceases operation. Financial losses every year since the road passed from private to public hands is given as the reason.

This railroad runs from Exeter to Hampton Beach, with several contrib-uting lines in Hampton, North Hamp-ton and Seabrook. It was built 18 ton and Seabrook. It was built is years ago when electric railroading appeared to have a bright financial prospect, this road serving at first a tremendous summer travel to Hampton Beach. With the coming of the motor vehicle the road ceased to pay. From 1909 until 1917, under private management, there was only one year in which receipts exceeded expendi-

During the years of public ownership and operation by the town of Hampton there has been a decline in income and in number of car miles operated every year. The first year, in 1921, the income was \$60,000 and expenses were \$69,000; in 1922, the income fell to \$55,000 and expenses were cut to \$60,000; in 1923 the income fell to \$47,000 and expenses were reduced to \$65,000; in 1924, the income dropped to \$43,000 and expenses to \$55,000.

This year there has been a still further shrinkage in patronage and finally the town decided to quit operating the road. As a last resort, employes of the road, motormen and cenductors, offered to take over the road and guarantee operation provided they could have full covered and the second beautiful see the DEDICATES HOME

and guarantee operation provided they could have full control over it. This proposal was rejected and the road will stop running on Saturday. The tracks probably will be covered over by a widening of automobile highways.

Nevertheless, she has evidently Nevertheless, she has evidency been studying the art of platform singing, and she revealed some of the results yesterday. Her efforts, with particular reference to clarity of enunciation, deserve commenda-tion, although yesterday one was conscious of the presence of the coach always at her elbow. It is difficult to adjust the robust art of the Italian stage to the more deli-cate, requirements of the concert hall. The effect yesterday was at times that of a child actress. Nevertheless, such a magnificent vocal organ cannot but give pleasure, whatever the medium.

Hamilton Hodges

Singing at Jordan Hall yesterday afternoon, Hamilton Hodges, selfof this particular shop and the man, moved to pity at sight of the poor animal, was considering calling the Humane Society when he spied a newsboy plodding through the slush crying his wares.

Society when he slush crying his wares.

"Care Selve" of Handel and Scarlatti's "Le Violette," Mr. Hodges man, more poor animal, was consider.

the Humane Society when he spied a newsboy plodding through the slush crying his wares.

Knowing the affinity of boys for traversed groups of well-chosen and called carefully arranged modern pieces, emphasizing English and American writers.

Then he brought to his listeners a novelty in "Waiata Maori," work of a New Zealand composer, one Alfred Hill, who would fain transcribe for so-called civilized audiences portions of the ceremonial music of the New Zealand natives. Mr. Hodges gave to this unusual and barbaric music a dramatic fervor and depth.

Another innovation, in the concert hall at least, came in the closing group of Negro spirituals, for which the very able accompanist, Clifford Kemp, provided organ, instead of the more customary pianistic, support. The sustained and penetrating organ tones became almost an integral part of the emotional appeal of the wellknown "Steal Away Home," "Sinner, Please Don't Let This Harvest Pass,' and "Deep River."

Mr. Hodges possesses something more than a pleasing voice of richness and smooth depths. He sings with feeling, with understanding, with imagination. To Bantock's fragment of pagan-like beauty, "The Peach Flower," he brought a poetic interpretation. In like manner, Dunhill's "The Cloths of Heaven," and Holmes' "Thrinodia," glowed with

washed and alarge house, tended to the furnace, and even weeded the flower beds and trimmed the grass.

One winter she was left with an elderly man who stayed with the far from perfect; words do not always emerge too clearly enunciated; ways emerge too clearly enunciated; then resonant tones sometimes present them. deep resonant tones sometimes pre-cede disconcerting high ones, either slightly off pitch or hollow.

Yet the impression left by this

singer remains a pleasant one. He drafts a program and sings, if not like a great concert artist, at least with fine musicianly comprehension.

### MAYORAL FIELD SURE TO LESSEN

to Get Full Quota of Needed Names, Is Seen

Developments in Boston's complicated mayoral campaign today indi-cate that the ranks of the 17 candidates who have been ostensibly in the running for several weeks will be marked with several withdrawals before many days have passed. The basis for this prevailing view is the difficulty which some of the candi-dates are understood to be experiencing in obtaining the necessary 2000 signatures of registered voter on their nominating petitions.

pointed out that approximately \$5,000 voters would have to be approached in order to obtain the nomination of all the candidates who have entered the contest, since 500 names are considered necessary to insure having 3000 qualified signatures. With little more than three weeks intervening before the election Nov. 3, it is expected that lack of petitioners will soon automatic petitioners will soon automatically narrow the race. This develop-ment, however, is not looked upon as likely to insure united Democratic

support for any single candidate.

James T. Moriarty, of the Sheet
Metal Workers' Union, and a member
of the Boston City Council, who is a candidate for Mayor of Boston, yes-terday received the indorsement of the Boston Central Labor Union. Mr. Moriarty and his friends say that in this means he will thus be assured of 70,000 votes, but there are other labor leaders in Boaton who say that the indorsement will not carry anything like the total vote of organized labor in Boaton.

thing like the total vote of organized labor in Boston.

The entry of Joseph H. O'Nell, chairman of the executive committee of the Federal National Bank of Boston, as a capildate upon whom the Democrats could concentrate their political power, has not as yet proved the anticipated solution of the complex problem.

plex problem.

Malcolm E. Nichols, former ternal Revenue Collector for the Massachusetts district, is regarded for the Massachusetts district, is regarded J. Bell generally as that Republican who will, in all probability, receive the greater part of the total voting overshistrength of the Republicans—a very dacies. much dehated nower. He is also attempting to draw to his candidacy a large part of the so-called independvote in Boston by reason of the dered. REUNION HELD AT

Architect's Drawing of the Eight-Story Building as it Will Look When Finished

250 000 home has been in progress marble floor; and coffered celling since last April, and will, according to an announcement today, be ready the second story. These stairs are of for occupancy in the spring. The membership of the present University Club at 270 Beacon Street will be consolidated with the much larger number of applicants who can now be accommodated.

With the finding of these come. The dining room is 55x80.

number of applicants who can now be accommodated.

With the building of these commodious headquarters it is emphasized that there is a much broader purpose behind the University Club project than the establishment of athletic, club, or hotel facilities: namely, that of bringing together men of many colleges in order to achieve a broader interest in public service. In the words of the club's executive committee, the plan is "to establish a club which will be and institution for fostering breadth of thought, kindliness of feeling, and which will afford moral stimulus to all our men."

The plan for a modern clubhouse or generated among some of the officers and members of the present club sevand members of the

originated among some of the officers and members of the present club sev-eral years ago and has been carried forward successfully by a specially appointed committee, consisting of J. W. Powell, executive chairman; James Jacksone treasurer; Henry I. Harriman, chairman building com-mittee: Clifton H. Dwianeli and Donald D. McKay, chairman, memhership committee. Co-operating in the work have been chairmen repre-seating with of the edilego's alamni groups in Boston.

### CHICAGO TRADE BOARD PRAISED

Believed by Mr. Jardine That Conduct Plan Will Spread

regial trop Monitor Burgan WASHINGTON Oct. 12-Action imilar to that of the Chicago Board of Trade, in adopting recommendations setting up a committee on business conduct and giving the board of directors power to limit daily fluctuations in emergency periods, will soon be taken by all

periods, will soon be taken by all contract, markets in the United States. W. M. Jardine, Secretary of Agriculture, believes.

"I have always vigorously advocated that prices be kept in line, with actual economic conditions," commented Mr. Jardine. "Any step in this direction is of benefit not only to farmers, but to legitimate business interests averywhere.

"With efficient administration of the panes, stopped by the Chicago Board of Trade, Esich I have every reason to believe, will accur, wild fluctuations due to manipulation should be eliminated. Competent, public-spritted men willing to accept appointment on the new business

should be colliminated. Competent, public-spirited men willing to accept appointment on the new business conduct committee will be able to perform in this way a real service to farming, industry, and commerce. "The adoption of this far-reaching plan makes it possible for the Department of Agriculture to cope effectively with the Chicago Board of Trade, as I pointed out in urging the acceptance of the plan. The ends contemplated by the grain futures act can be most fully reached through means of fully taid. Laws are most effectual when the by sensible, sound co-operation on the part of everybody concerned. I congratulate the Chicago Board of Trade on its adherence to this steen. Not the least important effect of this action taken will be the establishment of public confidence in the market, the benefits of which are advious."

Mr. Jardina has noted with approvating adoption than anoted with approvating adoption of a similar plan by the Mainteapoins Chamber of Commerce, and convenients in favor of like systems on other exchanges. Future provision has been made for an auditorium which will seat 1800 people. Entrance to this auditorium may be had from either the second floor, elevator lobby of the main club building, or directly from Stuart Street through a large lobby, thus permitting the use of the audi-torium independent of the club. Provision has also been made so

### A Town Cools the Hot Sands of the Great Utah Desert

on railroads is that there is no smoke from the trains! The buildings are modern. The courthouse, a two-story brick building, is as complete, inside and out, as any modern courthouse could be. The stores are stocked with all manner of goods, but as any modern courthouse could be the stores are stocked with all manner of goods, but as a way of the stores are all the stores are stocked with all manner of goods. Millions Have Been Made in Quiet Kanab, 130 Miles From the Nearest Railroad

HE town of Kanab lies at the tables, to sink into the red clay and edge of the desert. Behind it the sand. red cliffs of the Utah canyon country rise high above the flat waste that stretches southward across Arizona. Under the towering cliffs, themselves a phase of the desert, is Kanab. It is the only patch of green in sight: a town of 1200 significant at the country of the countr desert, is Kanab. It is the only patch of green in sight: a town of 1200 people, 130 miles from the nearest railroud.

road.

he red cliffs burn under the thern sun, and fine sand sifts re the faces of them. The deserters before the eyes as the heat from it, and slow moving whirlds send spirals of hot rand into air.

winds send spirals of hot band into the air.

It is a dry, sandy, powder-like country. But Kanab is an oasis. Trees line the streets; sidewalks are inclosed in leafy coolness; flower gardens wave brilliant colors in hot breezes, and green lawns sparkle under twirling sprays of water. The perfume of roses greets the pedestrian wherever he goes; the sweet incense of honey locust and flowering should be about the serving shrubs floats on moist air.

Kanab is an old town. Its brick houses and those of atone, its towering poplars and sprending elms lender a souch of New England solidarity to this oans of the western desert. It was settled many years ago, when the Mormons pushed southward from Salt Lake up the valley of the Sevier and then across the mountain divide to the desert. It was not simple matter, this building of Kanab. Time and again the settlers had to hurry to their stone fortress to re; el Indians; time and again they had to do their work over. And neither was it a simple matter to make the desert habitable. The naht against the sands was completely won only a few years ago; the Intelbattle in the subjugation of the desert.

Once a Trail, Nowin Canyon Once a Trail, Now a Canyon

A small stream of water trickled out of the red cliffs, cutting a deep canyon through them. It spread out over a green meadow just as it left the hills, and it was on this meadow, at the point where the canyon met the desert, that the first people of Kanab settled. But sheep wore deep trails over the meadow, and water ran down the trails and cut them deeper. One sheep trail got more water than the rest, and when the melting snows one spring sent down a deluge of water, it made a deep wash-out of the sheep trail. That canyon is now 300 feet deep, and borders the present town of Kanab. The green meadows were gone, and a trickle of pea green water down in the bottom of the canyon was all that remained. that remained.

The people of Kanab couldn't for-sake their town. So they dammed the creek two miles up the canyon, and piped the water to town. This constitutes their present irrigation system, although six dams in the canyon have been washed out in the canyon have been washed out in the spring, and the seventh now stands -- perhaps to await its turn.

Drinking water was the next prob-lem the people of Kanab had to solve. The water of the creek was good enough for irrigating, but it was a failure for drinking or cook-ing, or even for washing. Now the people went out in search of water. They searched the dry hills back of the town. The found a spring, seven miles away. They got California redwood and bored to out and made pipes of it, bound with wire. The redwood is better than iron, for it does not rust, and it will keep a great many years. They piped the water the seven mile to town. The

hunters went out, and the result was the present water system of Kanab. the present water system of Ranab. Nearly eight miles up a canyon for-merly peopled by cliff dwellers, they found three springs coming out of the earth in old caves. One of these was high up on the canyon wall, but they high up on the canyon wall, but they brought it down in a pipe. The other two had formed subterranean lakes in deep caves. They piped this water put also. In order to tap one of the oprings they had to run an open trough along the side of the cave to catch the water as it dripped from the rock.

These short pipe lines were connected to a main artery of redwood they built up into the canyon, and it took its quota of water down to Kanab. Other springs were tapped far back in the hills, and now the main pipe line deposits its 104 gallons of water a minute into an underground reservoir just above the town. At last the people of Kanab, having had the gumption and sense to gather all the water they could find in the hills, have all the pure spring water they can use. It serves for drinking, for general household use, and it spurts from lawn sprinklers like handfuls of diamonds. The allowance is 120,000 gallons of water a family anyear, and the cost for each family under the co-operative arrangement is \$8 annually. Thus they have solved their drinking water problem.

Irrigation and Swimming Irrigation and Swimming

The irrigation water from the creek, piped into town, runs in ditches that line the streets. It is directed in its course by the city water man, who opens and shuty gates, distributing it to gardens, fields and hay meadows. Every five helds and hay meadows. Every five days every resident of Kanab gets water for irrigating. Each resident has a card showing the dates he will get water. This is worked out at the beginning of the season. So every five days tiny streams of w ter flow between rows of vege-

deavoring to obtain signatures for the following declaration:

the following declaration:

Believing that law must take the place of war in the settlement of international disputes and desiring to increase the effectiveness of the League of Nations by individual action, I, the undersigned, pledge myself to withhold service or support from any Government which refuses to submit the causes of the dispute to arbitration, or which refuses to accept the decision so given.

It is, however, felt by many ardent lovers of the cause of peace that while arbitration in all disputes should undoubtedly be the ultimate aim, it is still too early to regard the adoption of such a formula as practical politics. Would it be either fair or logical, they asked, to insist that a dispute, say between Italy and the United States over the question of emigration, should be submitted to arbitration? And would the United of emigration, should be submitted to arbitration? And would the United States accept the decision of an arbitrator if the award provided for the acceptance of more immigrants of the United States itself was of the undoubted evolution that has taken place.

FRENCH WOMEN ENTER BUSINESS

Proportion to Total Workers Largely Increased Since the War

By SISLEY HUDDLESTON PARIS, Sept. 28 (Special Corre-pondence)—It has become a com-nonplace to state that the war has brought about a greater emancipa-tion of the French girl. There has, above all, been a marked feminine intellectual movement, which is be-

ready to admit?

Again, it is asked, if arbitration is

It is necessary to compare the sta-Again, it is asked, if arbitration is the correct method of settling international disputes, why is it not suitable for the settlement of industrial disputes also? There are, indeed, many who believe that to press for international arbitration before it has been accepted nationally for otrikes and lockouts, is putting the cart before the horse, and foredooming the wider movement against war of failure.

### "BIG BROTHER" IN AUSTRALIA READY TO AID NEW SETTLERS

Residents in Group Settlement Districts Help Land Occupation in Western Australia by Giving Newcomers the Benefit of Experience

PERTH, W. Aust., Sept. 10 (Spe-producers, and s) the sacurity of the cial Correspondence)—A valuable land for those who stay is deprefactor in the promotion of land set-ciated and others are depressed. tement in the southwestern areas of the State is likely to be the "big brother" scheme which the settlers have in hand. The idea originated among the men of the group settlement districts who, having found it so successful themselves, not only from the point of view of social har-mony, but as a material benefit to industry, are anxious to extend the

by his criticism, and intend to go ahead enthusiastically with their organization, convinced that it has great social merit, as well as important advantages for the production of the construction of the con a success and have one large happy family of producers.

The movement has appealed strong-ly to the former Premier (Sir James Mitchell) whose Government established the group settlement system. Although the scheme has now been abandoned, the groups already in existence will be carried on According to the latest reports, these set-tlers are making excellent progress. Sir James Mitchell says established eitlers and others in these group settlement districts have already done a great deal toward helping newcomers, and have enabled them to overcome the strenuous and often heartbreaking duties of pioneering. Criticism and opposition have the effect of driving away some of the

was a total of 2328 women, as against 31,791. There were, in other words, 13 or 14 men students to one

Woman Students Increase

But during the scholastic year of 1923-24 there were 1023 women, as Government Moves to Stamp against 14,302 men in law; 1248 women, as against 9283 men in physical science; 2870 women, as against 4295 men in letters, and if one totals the figures of all the faculties, there were 7786 women, as against 36,576 men. This means that there were only four or five men students. as against one woman student in ernment has declared war without

the university.

It will be immediately acknowledged that such progress in a period of 10 years is remarkable. But this is not all. At the Ecole des Chartes the work of the girl students has been brilliant. They have penetrated the portals and carried off the first prizes. In 1923-24 two girls led the way. This year 10 candidates re-ceived the diploma and three of them were girls. In the same way, in the examination for librarians, nine candidates were received and three of them were women, in 1920. In 1921, eight out of the nine candi-dates received were women. In 1922, the girls were successful in the proportion of 10 to 16.

#### Girls Obtain Diplomas

At the Ecole Centrale des Arts et Manufactures, no women were received before 1918, but in 1921 seven obtained the diploma, and in 1922, nine. At the Ecole des Beaux Arts, obtained the crystal obtained the color described by the color of the more supported by the color of the more supported by the color of the national capital. From

shows that letters—history, philology and literature—are chiefly favored by women. Physical sciences follow. Then comes the study of the law and afterward the beaux arts. These studies open the door to many professions which were practically closed to women only a few years ago, and there can be no question that they have shown their aptitude and their efficiency in branches of work for which it was long thought ney were not especially qualified. The figures are in themselves in-

tersting, but it should also be borne in mind that there is constant prog-ress, and if so much has been done in 10 years, which can hardly be regarded as favorable years, may expect that much more wi done, now that the impetus has been given, in the coming generation,

#### Station WGY Finds That Recent Tests Attracted Much Attention

SCHENECTADY, N. Y., Oct. 10 (Special)-Now that "several schedules of superpower radiocasting have been transmitted, the following staten.ent by the radio engineers of the General Electric Company will be of considerable interest to those who are following this recent development. Careful conclusions are given, based on the first tests which were carried out at the request of the United States Department of Commerce. The data on the more recent transmissions are not yet sufficiently digested to be included now. Some thousands of letters were

received by the company on the tests of Aug. 22, 24, and 25, and they have been of great assistance in permitsuperpower in furthering the cause of a universal radiocasting service. It is hoped that the listeners will respond as helpfully in further series of tests. Their co-opera-

Fifteen hundred letters selected at random have been carefully recorded by dividing them into groups, fol-lowing the method suggested by the Department of Commerce. All state ments of signal strength, for example, were separated into three groups according to whether they rer the 50 kilowatt equal to the 2.5 kilowatt; the 50 kilowatt twice the 2.5 kilowatt, or the 50 kilowatt signal more than twice the 2.5 kilowatt. Quality reports were grouped so as to separate those reporting the 50 kilowatt better, those reporting the 2.5 kilowatt quality better, and those reporting equal quality. Fading sharpness of tuning, and the answer Fading. the other questions were divided in a similar way. Then all the letters in each group were counted and averages taken to show the true general feeling of the public in each

In drawing conclusions from such a test it must be remembered that there are naturally many conflicting reports. Some listeners may have peculiarly poor locations and others good ones, so that their observations conflict with the average. But the average is, nevertheless, the best inlex of the general satisfaction with

Most of the letters state that the superpower was more than twice as loud as the ordinary power and a number have been received where the increase was 10 to one. Thirty er cent of the reports say that there is no choice between the two in quality, and the remainder are fairly evenly split in favor of one or the other transmission. Fading is shown to have had much less effect on the ligh power. Reports on the sharpness of tuning are practically unani-mous in showing that it was just as easy to tune out the high power as the regular set, only a very few of the letters complaining of any "blanketing effect" due to the high

duced the desired effect of increasing the signals at a distance without unduly preventing reception of other stations near the transmitter. This of radiocasting. And the quality of high power, as shown by the last two nights of test, can be made perfect

by skilled design of transmitters.

We look forward to the further cooperation of the public in sending us reports of our transmissions so that we may make the best use of our extensive developmental facilifles at the South Schenectady labora

### Obesides Box

have excellent opportunity for a long high antenna, if of advantage. I am using a radio frequency set with a primary of 12 turns and a secondary of 55 turns, on a three-inch tube, P and S being about a three-inch tube, P and S being about three-eighths Inches apart. Now if I should use an antenna 200 feet long it would be rather long for good selective tuning, in fact my best work has been with an antenna of 70 feet, but would it not be practicable to use the 200 foot antenna and cut a .0003 variable conclemer in series with the antenna, at the set, thereby giving me a valuable amount of 'picking-up' wire in the air, so to speak, but of a normal natural wavelength because of the variable condenser introduced in the antenna circuit?—H. E. D., Hingbarn, Mass.

(Ans.) The insertion of a variable con-

introduced in the antenna circuit?—H. E. D., Hingham, Mass.

(Ans.) The insertion of a variable condenser in series with your antenna would prove quite feasible permitting the use of a long antenna and giving you in effect a control of its length. But since, you are using tuned R. F. why in the world utilize a transformer which inherently is so poor as the one you describe? I realize that, the design is probably one in which selectivity is sought but there are better ways of securing selectivity than-by using a transformer with so few turns and such ineffective coupling between the primary and secondary. This type of transformer makes neutralization very easy but why burn a tube to build up a lot of energy and then deliberately throw it away when transferring it into your detector circuit? Why not try a glot-wound primary transformer such as has been described in this paper from time to time? You will probably find your antenaseries condenser will make up for such lack of selectivity that this transformer might give, although its selectivity-to-amplification ratio is far higher than any other we have seen.

#### FASCISTI PERPETRATE SEVERAL REPRISALS

LONDON, Oct. 10 (A)-The Daily Express says that the Fascist re-prisals in Florence for the assassination on Oct. 3 of Cavalier Luperini a member of the Fascist Party direc-torate, included the killing of a num-ber of anti-Fascists, most of them and the former Socialist deputy, Signor Pilati.

Famous shops in the heart of Flor-ence and a number of private homes were sacked and some burned. The city was under a reign of terror dur-ing the Fascist outburst of revenge. The newspaper says that until now a censorship has veiled the secret from

At first the few amateurs in Uruguay constructed their own radios, etc. Then one or two and later many merchants began to import complete radio receiving sets and today there is a good display of the most up-to-date receiving equip-ment, according to the department's information. The prospects for a decided increase in the use of radio in Uruguay are said to be most promis-

#### CHRISTIAN SCIENCE LECTURE RADIOCAST

Special from Monitor Bureau NEW YORK CITY, Oct. 12-A Christian Science lecture, to be delivered by Peter V. Ross, C. S. B., of San Francisco, Califf a member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., Oct. 12, will be radiocast by Station WMCA, New York, 341 meters wave

length.

The lecture, which begins at 9 p. m., eastern standard time, is being given under the auspices of the Churches of Christ, Scientist, in Greater New York, and will be relayed from the auditorium of Third Church of Christ, Scientist, BrookGerman and American "Hams" Communicate

New York, Oct. 10 FOR the first time in the history of amateur radio, an amateur station located in Germany and one in the United States recently successfully carried on two-way communication by telecode. Actual limitation of radio equipment was fol-lowed by the war-time ban on radio communication in Europe, so that it has only been in recent months that an opportunity presented itself for a German amateur to attempt any such ambitious undertaking. In fact, even now, German radio licenses are confined to laboratory equipment, and in consequence private communication is a matter of the greatest

A station in Rottenberge how ever, undertook the task. The oldest private station in Germany it was backed by a considerable antiunt of radio experience and knowledge, although its operator that far had lacked that pleasant thrill so common to American amateurs, of communicating with almost all of the distant countries of the globe.

When circumstances were right, the Rottenberg station operator tries calling America, He had at-ready logged calls from a number of setions, including 22 KB, and in of sixtions, including 22 KB, and in consequence to had some definite hopes. His "CO," a general call for someone to talk to, brought a respipese front United States an-tion 2 KKB, ewnell and operated by Charles Butt of Schenectady.

Finance Minister Limactour was able
to accomplish in the early years of tention of the Government to seek ment of the Minister of Commerce, any Shannon loan, but to advance the moneys that were required from the State Exchequer, and then to reimburse that exchequer by a national loan. In other words, it is recog-nized that the Shannon scheme would not of itself give sufficient security for the loan of moneys except on such usurious terms as to make such h loan utterly impracticable.
The national credit is, therefore,

The national credit is, therefore, being extended over the scheme. Such losses as may be incurred will be borne not by the Shannon, but by the nation and may be incurred in several ways. A loss, for example, will certainly be incurred in several ways. A loss, for example, will certainly be incurred in the present consumption of electricity has been increased threefold. As the country is now in the trough of company very serious. Similarly, a loss will be certainly incurred if the estimate provided by Siemens-Schuckert has to be increased, because of a ligher wages bill than was estimated.

In the Ship Lanes

Dy Frank Lin Snow

New York in the last few months that shipping men who inspect all the medy arrivals to compare their various features have had an unusual oppertunity to study the trend in inassenger ship, construction. The Caledonia of the Anchor Line is the lafest ship of the new vessels to reach port, being the fourth ship of that name operated by the company let aster ship, the Franaylvania, also entered service recently, the vessels being used on the New York-Glasgow route.

The Caledonia is of 17,000 tons displacement and is \$75 feet long, having a speed of 17 knots, and providing accommodations for 273 first class, 341 second class and \$80 third class passengers. Special features appealing to Scote passengers are embodied in hor furnishings. The first Caledonia operated, by the Anchor Line was built in 1852 and was half the length of the present one.

Outstanding in the thip construction in recent years has been the conservative tendency displayed both in drag and speed of the new steamships.

The account of water the ship of the vessels will be engaged in a series of five cruises to the West many than the length of the present one.

Outstanding in the thip construction in recent years has been the conservative tendency displayed both in drag and speed of the new steamships.

operated, by the Anchor Line was built in \$482 and was half the length of the present one.

Outstanding in the chip construction in recent years has been the construction in recent years has been the considerant of the present of the new steamship. The average longth has been 600 feet, the displacement in general has not exceeded 20,000 tons and the speed has been 17 or 18 knots, making the transatiuntic crossing a seven to nine days' trip depending upon the port.

All the new ships are, of course, oil burners, although one vessel soon to enter service—the Gripsholm of the Swedish-American Line—is motor driven. Attention has been paid to the third class travel in providing more attractive and commodious quarters. Public rooms are concentrated on the upper deck and most of the hospis include the features now expected by occan travelers such as swimming pool, gymnasium, verander ation of construction of large ships of the Majestie-Leviathon—Berengaria type. Their speed is produced by an excessive consumption of fuel; adding proportionately to the coast of operation, and the Shipping Board's frequent intimations as to the gost of the lack of profit in managing the larger ships. The foreign ships not being subject to the high wages which American vessels must by law pay their crews, are able to make a some what better showing.

MEXICO'S INCOME FROM OIL

BASIS OF NATION'S UPBUILDING

Construction of International and National Highways Paid

of a century ago, Mexico has produced more than 1.250,000,000 barrels Finance Minister Limartour was able

the present century Big Gain in Revenues
But even in 1910, the most prosperous year of the Diaz administration, Industry and Labor. This sold for more than 2,000,000,000 pesos or \$1,000,000,000. In one year alone. the income of the Mexican Government had reached only 120,000,000 1921, more than 200,000,000 barrels were taken from Mexican soil. For pesos yearly, this not withstanding the several years past the oil industry has produced for the Mexican Gov-ernment in the neighborhood of 125,fact two two lines of railway con-nected the national capital with the United States border and another 000,000 peses yearly. And this is only reached to the Gulf Port of Veracruz a part of the story as other busi-nesses which have sprung up directly through the production of oil in Mexand still another to Tampico while lines of less importance connected the gulf with the Pacific from Veracruz to Salina Cruz and from Puerto Mexico (Coatzacoalcos) also to Salina Cruz and from this latter line to the Guatemalan border. Under President Diaz industry, commerce, trade and transportation had become exceedingly active and had assumed pro-portions unhoped for at the beginning of his second administration in 1884.

Yet the government income had reached only 120,000,000 pesos. Now the income from oil and in-dustries depending on oil is fully 50 per cent more than the total income of the Diaz Government in its most flourishing period. The decline in the agricultural production of Mexico, natural to the period of reconstrucnatural to the period of reconstrucindustrial activity of the Nation have been passing, has been amply offset by the oil production and other ac-tivities which are the direct result of the development of the oil industries in Mexico; so that now the yearly income of the Mexican Government is in the neighborhood of 360,000,000 pesoa yearly, or three times that of which the Mexican Government has maintained the oil tax in the face of strongly organized opposition; for was and is looked upon as the bul-

wark of the Nation especially in the days when revolution and unrest had torn the country into disintegrated factions. One-Third National Incom-Today petroleum, in addition to turnishing close upon one-third of the income of the Mexican Govern ment, supplies large sums of money for the construction and mainten-ance of international and national highways, perhaps the most pressing of Mexico's material needs. Within a month the construction of more than 1000 miles of highways will will be spent on the work. money comes largely from a tax on

certain other phases of the oil in dustry. Al. ough the oil leaders either directly or indirectly, are contribut ing very largely to the highway con eventually undoubtedly gain more than this expenditure in the exten-sion of commerce, industry and 'agriculture which the new highways will undoub edly call into being i the very near future when the con sumption of gesoline, asphalt and

other petroleum prod..c Although petroleum is now a r intimate part of the life of the Mexi can Nation it seems almost certain to assume a still more important role in the very near future since, according to government surveys and expective oil fields of Mexico have as

## THE HOME FORUM

#### Adventures in Success

Twast taken to task recently by the editor of a great magazine for having criticized his publication adversely on the ground that it exalted the ideal of material prospens of beauty and magnifed success at the expense of beauty and the more spiritual values. There was nothing for having private along the first provided his account of a sincere effort and to confess that I had based my judgment on a superficial knowledge of the the thing I had assumed to criticize. And yet I went in the discovered assumed to criticize. And yet I went in the discovered and the content of for me to do at the moment but applogize for having spoken ill of a sincere effort and to confess that I had based my judgment on a superficial knowledge of the thing I had assumed to criticize. And yet I went to do.) A poor North Carolina by became the head of a chain of thirty-seven stores. The career of

And let me add parenthetically that I realize I am in a hopeless minority. This magazine has, I believe, a circulation of something like two million and a half. Presumably two and a half million people like it.

Many of them, I am sure, are helped of a many telling articles into one issue of the many of them. I am sure, are helped of a many telling articles into one issue of the many of them. I am sure, are helped of a many telling articles into one issue

land to quicken ambition, and the rise makes a man healthy and whow of it is given an important place. Perseverance, industry, determination are glorified, as well as honesty and square dealing. The influence of this must be good within

fluence of this must be good within certain limits. I am convinced that the editors believe themselves to have a definite message and mission, to be engaged in a moral crusade, and I cannot but honor them for it. And yet in the back of my thinking lingers the impression that they are missing something.

In the second place, the entire magazine was not given, up to the sort of thing I had criticized. In one typical issue I counted four pieces of fiction, only one of which I read. There were six articles which I could not seriously criticize on the grounds stated. At least two and possibly four contributions might fairly be said to exalt spiritual values. But let me mention scriatim the twelve others, and please note that they constitute more than half of the contents of the number. These contents of the number. The seasy to satirize the success story. W. S. Gilbert did it to perfection when he had the Admiral in "Pinafore" sing his autobiography. The song runs absolutely true to form. As office boy for an attorney's firm he washed the windows and swept the floor and polished up the handle of the big front door, polishing it so carefully that he became the ruler of the Queen's navec. No, there is something better than mere outward material success. If the editors of a magazine do not see in the exploit the other things, that is their affair, and it is probably not for me to criticize them. Their own success is their answer. I only ask them not to scold me for not being thing the exploit the content of the captering of the number. These contents of the number of the captering the success. the twelve others, and please note of seeking beauty and contentment, that they constitute more than half and it is of such things that I prefer of the contents of the number. These are, generally speaking, stories of achievement, chiefly biographical.

The second things that I prefer to write.

For some o, us are not content to devote our time entirely to a A boy in a brickyard became a master builder of churches. How to combat the weakness of indecision

away with the feeling that I was somehow right.

And let me add parenthetically town hotel keeper does his job. From Nagro butter to farnous photos.

Many of them, I am sure, are helped by exactly what is printed in it. Nevertheless, I cannot refrain from lifting up a lowe voice in the wilderness against this thing.

At my earliest opportunity I examined copies of that magazine with some care to see whether I had any justification for my criticism or not. Partly, I discovered, I was wrong. In the main, I decided, I was right, provided my own peculiar point of view be granted. thing else, something more subtle, something that has to do with the human heart, even with the hearts of the unsuccessful as the world judges.

the unsuccessful as the world judges. These editors. I think, have formulated very cleverly a deep-seated national ideal. It is the old ideal of the Hortio Alger books. This magazine is a sort of elaboration of Poor Richard's Almanac. We have long lavely enter term. Success of various sorts is held before the youth of our land to guicken ambitton, and the rise makes a man healthy and

to devote our time entirely to a single-minded struggle for success. whether that success is measured in terms of dollars or not. We want something as we go along, some ap-preciation of beauty, some stable preciation of beauty, some stable satisfaction, some continuous sense of enrichment mentally, some contact with noble thinking, some warmth of human fellowship. The fact that seems to have been lost sight of in this success propaganda is that the human soul is capable of more than one sort of aspiration.

Coleridge was easily pre-cament, and his great examples of the quality —the Ancient Mariner, Christaud, Kubla Khan—are work beyond Wordsworth's range. But it is persaight of in this success propaganda is that the human soul is capable of more than one sort of aspiration.

Tritten for The Christian Science Moni Because I have a book. All day the sun may shine; Deep in my heart I look And everything is mine.

Though storms may rage outside. Here in my ingle-nook I find at eventide Peace with my friendly book

The home-door opens wide

And you come in with ma; The world is at my side, A book and you to see.

Ida Crocker Duncan.

### Apocalypse Jewels

Written for The Christian Science Monito There are no words As chrysoprase, Chalcedony, And jasper—clear As dew or tear— As sardonyx And chrysolite; The beauties blend, The rhythms mix Of sound, of sight.

Could plan or chance Symbol or sign In utterance Your grace enhance— Where thought is stirred At color heard, At music seep poetry processional? these have been Your gift to me.

Foundation stones. Your beauties bless The ambient walls Of consciousness. And thought's clear sight Than chrysolite More purely shines Through cloud, through clod, Reflecting what my soul divines Of good, of God. S. B. Cave.

### Milly-Molly-Mandy

By JOYCE BRISLEY She had a Father, and a

This little girl had short hair, and solemnly, and said: short legs, and short frocks (pinkand-white striped cotton in summer, and white striped cotton in summer, ver, string for Grandpa, red wool for and red serge in winter). But her name wasn't short at all. It was millicent Margaret Amanda. But Fäther and Mother and Grandpa and think about. But I promise to take Grandma and Uncle and Aunty you for a walk when I come back!" the penny, an couldn't very well call out: "Millicent Margaret Amanda!" every time the gate, and set off down the road, "That's a g they wanted her, so they shortened it to "Milly-Molly-Mandy," which is

quite easy to say.

Now everybody in the nice white cottage with the thatched roof had some particular job to do-even Milly-Molly-Mandy.

Father grew vegetables in the big garden by the cottage. Mother cooked the dinners and did the washing. Grandpa took the vegetables (which Father grew) to market in his little ponyeart. Grandma knitted socks and mittens and nice warm woolies for them all. Uncle kept cows (to give them milk) and chickens (to give them eggs). Aunty sewed frocks and shirts for them, and did the sweeping and dusting.

And Milly-Molly-Mandy, what did

she do?

A Busy Bee

Well, Milly-Molly-Mandy's legs were short, as I've told you, but they were very lively, just right for running errands. So Milly-Molly-Mandy was quite busy, fetching and carrying things, and taking messages.

One fine day. Milly-Molly-Mandy was in the garden playing with Toby the dog, when Father poked his head out from the other side of a big row of beans, and said: "Milly-Molly-Mandy! Run down to

Mr. Moggs' cottage and ask for the trowel he borrowed of me!" So Milly-Molly-Mandy said: "Yes,

Farver!" and ran in to get her hat.
At the kitchen door was Mother,
with a basket of eggs in her hand,
and when she saw Milly-Molly"Hello, Milly-Molly-Mandy! I've Mandy she said:
"Milly-Molly-Mandy, run down to Mrs. Moggs and give her these eggs.

She's got visitors."
So Milly-Molly Mandy said: "Yes, and took the basket. Trowel for Farver, eggs for Muv-

Then Grandpa came up and said: "Milly-Molly-Mandy, please get me a ball of string from Miss Muggins'

shop—here's the penny."

So Milly-Molly-Mandy went on her tail, the largest as So Milly-Molly-Mandy went on her tail, the largest as way with the basket and the pennies all the butterflies. Grandpa!" and took the penny, think-ing to herself: "Trowel for Farver, eggs for Muvver, string for Grandpa." As she passed through the kitchen, andma, who was sitting in her

armchair knitting, said:
"Milly-Molly-Mandy, will you get
me a skein of red wool? Here's a

Chicken-Feed for Uncle

So Milly-Molly-Mandy said: "Yes, way with the empty basket.

Next she came to Miss Muggins' Grandma!" and took the sixpence. "Trowel for Farver, eggs for Muv-ver, string for Grandpa, red wool for "Please, Miss Muggins, can I have ver, string for Grandpa, red wool for Grandma," she whispered over to

herself.

As she went into the passage, Uncle came striding up in a hurry.

"Oh, Milly-Molly-Mandy." said Uncle, "run like a good girl to Mr. Blunt's shop, and tell him I'm waiting for the chicken-feed he promised couldn't remember what the pany couldn't remember what the string and the wool into Milly-Molly-Mandy and a sixpence in exchange. So that

Uncle, "run like a good girl to Mr. Blunt's shop, and tell him I'm wait-ing for the chicken-feed he promised

So Milly-Molly-Mandy said: "Yes.

"Sweeties, perhaps?" said Miss
Uncle!" and thought to herself: Muggins glancing at the row of glass
"Trowel for Farver, eggs for Muvver, string for Grandpa, red wool for But Milly-Molly-Mandy shook her

skein of red wool for Grandma?"

message, and then she sat down on the doorstep and thought and thought what that penny could be

And she couldn't remember. But she remembered one thing: "It's for Aunty," she thought, "and I love Aunty." And she thought for just a little while longer. Then suddenly she sprang up and went back to Miss Muggins' shop.

"I've remembered!" she said. "It's needles for Aunty!"

Mother, when she got there (they were just going to begin dinner). "I thought you were only going with

"And my string!" said Grandpa.
"And my wool!" said Grandma.
"And my chicken-feed!" said Un-

"And my needles!" said Aunty. Then they all laughed; and Grandpa, feeling in his pocket said: "Well, here's another errand for you—go and get yourself some sweetles!" So after dinner. Toby had a nice

Margaret Ann and the Blue Jay

ARGARET ANN had been hunting all morning long for a tiny china doll that had been tucked in the toe of stocking at Christmas time. It

soft blanket. Sometimes she would "That's a good little messenger to sold first and contented indeed.

So after dinner. Toby had a nice walk and his mistress got her carry it around in the palm of her warm hand, or take it with her to ward her shouting that there was a off for home.

"That's a good little messenger to "The Rahy"

when you played with her last, dear," advised Mother.

Margaret Ann did think. These fine

spring days she had been taking her for rides in the doll's carriage along with Betsy Jane and Clarabel. She thought still harder. On Thursday she had walked to the edge of the woods in search of trailing arbutus. On Friday, that was yesterday, she was only a wee bit of a baby, but had wheeled the carriage out under Margaret Ann loved it dearly. And the cherry tree, and had hunted for now it was lost! the cherry tree, and had hunted for violets in her own back yard. She For a few weeks after Christmas she had kept it in the cradle with the dolly cuddled up under the them down in the grass to play that them down in the grass to play that they were picking violets, too.

The Baby Margaret Ann had snatched up Betsy Jane, hustled her into the car-

riage, and had wheeled the carriage furiously back to the house. The only thing that mattered just then was to see that new baby.

"Well, I declare, Miss Margaret on the porch with a watering can

"No, I s'pose not, Katie," said home for alligators and all kinds of lovely curly snakes.

"Sure now, it'll turn up. But you just take this can and fill the birds' bath. I've got gingerbread in the over."

swamp which made a wonderful kome for alligators and all kinds of lovely curly snakes.

"You are very fortunate, sir," he solden shoes!" she cried. Then she started up gayly. "I'll go and ask may friend the shoemaker if he won't make me a pair."

worse, "I would give the worse for dust, and it would give the worse for dust.

had some dead leaves in it. Margaret Ann washed them out, and then she filled the bowl full of water. The birds would be pleased with their nice clean bath, but they did not have any dear little doll babies to lose.

fun to watch them. They would scold, too, when they got in each other's way, and that would make Margaret Ann laugh.

The Blue Jay's Treasure

There was one beautiful Blue Jay who flew back and forth between the willow tree and the bath, time and said Beau St. Bernard presently, "I time again. And each time he lighted on the rim of the bath, he dropped And Shy Squirrel answered, "By all garet Ann was growing very much interested. The fourth time he forgot his treasure and flew away with-

The Adventures of Beau St. Bernard, Shy Squirrel, and Cutey-Kit

These stories are about a big St. Bernard dog, whose name is Beau St. Bernard; a little gray squirrel, called Shy Squirrel, and Cutey-Kit, the little cut that lived with them. These three companions are very fund of traveling, and have already traveled from little old England to the United States of America, across the heaving, seething ocean, in a gray and silver airplane. They have visited the falls of Niapara, and crossed the continent, flown all down the western coast, and stayed archile in California, and now we meet them again in Florida.

But now it was Saturday, and she had been hunting all the morning for the lost dolly. There wasn't a sign of it under the cherry tree. The had searched all over the yard. At last she sat down on the back porch steps, feeling quite longity. Florida for quite a long time, and every day they went swimming in the sparkling blue water, and every other day they took little feet were shod with golden slipesting things around. Beau St. Bernard was very much interested in the Everglades, miles and miles of swamp which made a wonderful home for alligators and all blades. go thirsty this morning are you, esting things around. Beau St. Ber-

People are taking all this nice, black, home-like mud, and draining the water out of it, and then they will grow millions of vegetables here. I've given in my notice, and I shall "Oh, dear, sighed Elsa, trying not

She set the watering can in the path, and sat down herselt on a, stump of a tree. This was generally good sport, for the birds loved to splash in the water, and it was great fun to watch them. They would the path and splash in the water and it was great fun to watch them. They would the path and splash in the water and it was great fun to watch them. They would the path and splash in the water and splash in the path and splash in the water and splash in the path and splash in the water and splash in the water and splash in the water and splash in the path and splash in the water and splash in the path and splash in the water and splash in the path and splash in the water and splash in the path and splash in the water and splash in the path and splash in the water and splash in the path and splash in the water and splash in the path and spl watch the great machines working surely leave a golden pathway beaway, turning the useless swamp into one big kitchen garden, to supply the thousands of people who have kitchens but not gardens.

The Moving of the House

When houses move Along the street it is a most Surprising feat.

The way they move Is not so fast. But always they Get there at last.

With rollers put Beneath they so A little at A time, you know.

towel out in the barn. I cuess we could borrow the roller out of that if we put it back. And there's another in the kitchen. I guess Bridget will let us use that, and there'd be a slow business moving houses."

"I think it's going to take a long "me";

"It is a section of take in the legs eating a nut, or one showing him with his pockets full. They are ways in "mind";

"Of course it will," said John. "It's My last is my last, so it's easy to a slow business moving houses."

"I think it's going to take a long "me";

"My third's not in "mid," but is alim with his pockets full. They are awfully funny pockets, but there is one fine thing about them—they won't ever wear out!"

two rollers just the same size. You go and ask Bridget, and I'll fetch the roller out in the barn."

So Mary went for one roller, and

One horse is strong Enough to pull The house along.

THINK it would be better," said Mary, "if my doll's house was over by the window instead of by the fireplace. If you will lift on one side while I lift on the other we can carry it quite easily." "People don't move houses that way." said John. "There has to be a house-mover, and a horse, and rollers. If I'm going to help move that house we'll have to do it the right way."

"I don't care how we do it." said Mary, "so long as we get it over by the window."

"All right "said John "I'll have to "Giddap. Dapple!" said John."

John for the other. It took some ex-plaining before Bridget knew what the roller was wanted for, and even the roller was wanted for, and even then she wasn't quite sure, but she took off the towel and loaned Mary the roller with the understanding that it was to be brought back when she had finished with it. And while John was getting the other roller from the barn he got also a long

Mary, "so long as we get it over by the window."

"All right," said John. "I'll be the house-mover, and we'll use my horse to pull the house. But we've got to have some rollers to put under it."

"I don't know where we'll get any rollers." said Mary.

"Yes aid Mary." said Mary.

The Tale of a Cricket

GRANDFA . GRANDMA . FATHER . MOTHER . UNCLE . AUNTY . MILLY-MOLLY-MANDY

NCE a little Cricket lived in he sang so cheerfully all But Milly-Molly-Mandy looked at the garden said to her neighbors: day that the lady who owned "I've got the dearest cricket; it makes me happy just to hear him!" But one warm, summer afternoon the shadow of a butterfly drifted across the grass. And the Cricket, looking up from his shady nook be-side an ivy-covered stone, saw that it was the much-admired Swallowcome when I get back—after I've side an ivy-covered stone, saw that taken Toby for a walk."

So Milly-Molly-Mandy went on her tall, the largest and handsomest of

and the sixpence.
Soon she came to the Moggs' cot-"How graceful he is!" exclaimed the Cricket," as if flying were the easiest thing in the world. Now I "Please, Mrs. Moggs, can I have the trowel for Farver?—and here are some eggs from Muvver!" she said. wonder if I couldn't learn!" And from that moment the Cricket

Mrs. Moggs was very much ob-liged indeed for the eggs, and fetched the trowel and a piece of seed-cake for Milly-Molly-Mandy's own self. At last, when the Cricket had practiced by himself for many days, he invited some friends to his first public performance. There was vivacious Miss Dragon

ought of nothing else.

Yellow Jacket who joined the party without an invitation. "My friends," began the Cricket, making a deep bow, "I have long felt that the Cricket Family did not make

the most of their talents. And therefore, I have learned to fly.'

"Oh." gasped the little A

As she got her hat off the peg, Aunty called from the parlor where she was dusting:

"Is that Milly-Molly-Mandy? Will you get me a packet of needles, dear? Here's a penny!"

So Milly-Molly-Mandy said: "Yes, Aunty!" and took the penny, thinking to herself: "Trowel for Farver, eggs for Muvver, string for Grandpa, red

Mead.

"No," she said, "and it can't be chicken-feed for Uncle, because that would be more than a penny, only I haven't got to pay for it."

"It must be sweetles!" said Miss Muggins.

"No!" said Milly-Molly-Mandy "but I'll remember soon. Good morning, to herself: "Trowel for Farver, eggs for Muvver, string for Grandpa, red

Many times he tried to fig, only to come down—bump—in the middle of the garden. And finally, the audience grew tired of watching him and oozed When—bump! Just as the Cricket was sailing along in fine shape he landed in a flower-bed only a short

"Is that the reason you don't sing any more?" inquired Swallowtail.
"Why, yes," replied the Cricket.
"Vve forgotten how, I guess."
"Oh no, you haven't," said the But-full of trash like that?" asked Benny with intense interest.

terfig gayly. "You may not know how to fly, but for that matter I never could sing. We can all do something, you know," he added wisely. "Cheer the country of the country up now, little Cricket." And he flew

"I wonder if that is true?" said the Cricket to himself.

Soon he crept out into the sunshine once more and lifting up his head, commenced to sing. At first his voice sounded rather queer, but after a while it grew clearer and clearer, the merry sound filling the garden. And the lady who lived there exclaimed joyfully, "I'm so glad to hear you again, you dear little Cricket. Where have you been this long time!" Cricket to himself.

Then the Cricket was very happy indeed, and knew that he, like every-one else, had work to do, and his place in the world.

have you been this long time!

You may not be a butterfly, And float o'er flower and thicket, But surely you can always be As happy as a cricket. Not a "Cross Word"

Puzzle

Just spell the word, forget the

**Nature Stories** 

Chippy's Pockets OTHING, decided Benny on the

first day of his stay, could-possibly be more fun than this visit with Uncle Jim at his little cabin in the mountains Fly, with shimmering, gauzy wings, pompous Mr. Bumble Bee, always very important and businesslike. In friends. This morning as they very important and businesslike, ing friends. This morning as they Grandmother Ant, and the young scrambled up the hill behind the Ants from Ant Hill, and even a stray Yellow Jacket who joined the party and avelained in a low velocity. and exclaimed, in a low voice, "There goes my little friend. Chippy, with

his pockets cram-jam full! "I don't see anyone," complained

Benny, searching the hillside with his eager eyes. "Where is he?" "Why, right there in front of your to a little reddish-brown animal with a pause, another would add the black and buff stripes running alons needed line. Perhaps if the pauses me. I saw her drop her."

Mother looked up in surprise. Then buff stripes and rhyming words are left out, some hind legs like a squirrel, and seemed other boys and girls will like to fill she smiled as she said; not at all afraid as it stared curi

ously at Benny. Cheeks as Market Baskets "But you said he had his pockets full," objected Benny, "and animals don't have pockets,"

Many times he tried to fix, only to come down—bump—in the middle of the garden. And finally, the audience grew tired of watching him and cozed here, whose real name is chipmunk, has some perfectly good pockets. But have quietly one by one. away quietly, one by one.

Then the Cricket sat disconsolately under a large mullein leaf, weeping bitterly.

Until—"Why do you weep, little Cricket?" asked Swallowtail, floating lightly down close by.

"Be - be - be - be cause," sobbed the Cricket, "I wanted to fly as you do. And I practiced and practiced. But when I invited my friends to come and see me, I came down—bump—every time."

"Is that the reason you don't sing that the the reason you don't sing that the amount he can carry in those pockets of his. If you watch until he turns his head around this way again, you will see botton this way again, you will see to you watch until he turns his head around this way again, you will see to you watch until he turns his head around this way again, you will see to you watch until he turns his head around this way again, you will see to you watch until he turns his head around this way again, you will see to you watch until he turns his head around this way again, you will see to you watch until he turns his head around this way again, you will see to you watch until he turns his head around this way again, you will see to you watch until he turns his head around this way again, you will see to you watch until he turns his head around this way again, you will see the you watch until he turns his head around this way again, you will see to you wat

explained Uncle Jim. "That is material: that he has collected to use for a home for his family. He and Mrs. Chipmunk are very busy at this time of year preparing a nursery to bring up their family in. But material for their home is not the only thing they carry. They turn their prockets. they carry. They turn their pockets into market baskets for food, too. It is very convenient when they want to carry home nuts and grains to store away for winter use. To empty their pockets they press their paws against their cheeks—and out pop the contents."

Making Friends ture of one to add to my collection!"

have some rollers to put under it."

"I don't know where we'll get any rollers," said Mary.

"You let me think a minute," said John. And then, after he had thought a minute, "There's an old roller-towel, and so it kept on rolling. My second I use when I often mean picture of him, perhaps I can get a picture of him standing on his hind.

"I shall try to make friends with him, too," said Benny enthusiastivally. "And if my camera doesn't in key:

"Towel out, in the harn I cuess we have a long."

"I shall try to make friends with him, too," said Benny enthusiastivally. "And if my camera doesn't frighten him, perhaps I can get a picture of him standing on his hind.

ouceh

What shall we do on a rainy day, On a day as rainy as ever can be, When the downpour keeps us a Donald, and Mary Clare, and me?

HAT is the rhyme which Philip made up as the three children perched, one autumn afternoon, on the window-seat in the playroom, with the rain batsteadily on the red tin roof

put that way, brought the answer, for Mary Clare cried: "I know. Let each one say what he sees or hears or thinks, and see who can make a rhyme about it first.

Then someone might say: It beats upon the window pane. But both boys added lines of their wn almost together:

All of us can see the rain-

Indeed, there's nothing quite so plain. You see, it was a rhyming family. The mother of Philip and Donald and Mary Clare, besides reading a good deal to them from Mother Goose, often made jingles of her own to make them laugh; and they all had the habit, more or less.

So now the game was on. One would mention a thought, and after "The Blue Jay found her, Mother, up to Palm Beach, as they had been

Today it rains for miles around, And makes a pleasant drowsy —

But when the springtime comes

Out in the street where'er one looks Are running little new-made Autumn leaves come drifting down; Some are red, and some are

## EDUCATIONAL

### High School Backed by a Fathers' Association of Nearly 2000 Men

Special Correspondence THERE is in connection with the Frankford High School of Philadelphia a fathers' association,

high order, needless to say, and thoroughly enjoyable.

It is through the speakers, however, that the greatest good is done. Every speaker is selected with care, and many are outstanding figures in public life; the Mayor of the city, the state superintenders of schools the state superintendent of schools, the United States Commissioner of Edu-cation, congressmen from Pennsyl-

the community. It has won a national reputation. It is 13 years old, and seems to have only begun its use-

It might well be asked: Just what does the Frankford High School Fathers' Association really do? What has it accomplished, of either itangible or an intangible nature What, definitely, is its program?

Particularly for Students' Welfare The object of the association, as set forth in its constitution, is: To set forth in its constitution, is: To bring the fathers of the students together socially, for the purpose of promoting the educational interests of the northeast section of Philadelphia, and, more particularly, to assist the faculty of the Frankford High School in all that pertains to the welfare of the students.

How much of all this is mere rhetoric? Those who live under the influ-

oric? Those who live under the influence of this association of "Dads" feel that it really has been of vital benefit to the community, to the school administration, and to the students, individually and collectively. In truth, it might be well to consider the activities of the associations of the associations are the activities of the associations are the activities of the associations are the activities of the association and the association of the association are the activities of the association are the activities of the association and the activities of the association of consider the activities of the association under just these three head-

First is the intellectual and spirit ual influence that, through the asso ciation, has been unconsciously spread abroad in this community. No serious man can listen to the high notes of individual integrity and civic responsibility that have been sounded from time to time in gymnasium of the Frankford School without being a better

The Fathers' Association has been largely responsible for giving proper supervision, declares Dr. H. Frankford a school, a school spirit, N. Sherwood, state superintendent and a student body to be proud of. In 1912, at the time of the inception of the association. Frankford was in rural school supervision constitutions.

grand stands, running track, and comfort stations, and will accommodate the great crowds that are, in increasing numbers, attending interscholastic contests. Besides, the stadium will serve as a place for patrictic rallies, pageants, and all sorts of outdoor performances. For two summers it has been the scene of a successful series of Sunday night be obtained with the proper conditions for supervisory work."

The experiment in supervision is in line with efforts in recent years in lindiana to remove inequalities in educational opportunities, centering principally in attempts to make the county, rather than the township, the limit of educational control. Dr. successful series of Sunday night on song services, which have been

attended by many people.

What has this association done to aid the school administration in its aid the school administration in its difficult task? Again, its finest con-tribution is something intangible. The principal of the school would be the first one to acknowledge that his greatest inspiration comes from the school; it is behind him.

What is true of the principal is ue of the teachers. There is at Frankford an absence of disciplinary problems, and a freedom from belligrent parents. This co-operative at- Sherwood. "If we are to insure ent that comes to the school, either voluntarily or by request, does not have its roots in a peculiar type of resident in Frankford, but rather is an unconscious process of commu-nity education. The idea is abroad that the principal and teachers mean

is true. And it is almost certain that the men to whom he would go would be members of the Fathers'

As has been said, the association sprang from the idea of helping the boys in their athletic activities. That a group of men numbering from 600 to 1000. These men confer for the fundamental purpose of helping the Frankford High School. There is always an entertainment and a speaker. The entertainments are of a high order, needless to any and

Through the musical clubs committee the association has purchased both instruments and music for the students' musical clubs, and had paid instructors to come to the school to help the boys and girls in their musical activities.

The association devotes much

money to scholarships. At the present time, for instance, about 100 cation, congressment and the states, college presultant, and other states, college presultant, and other states, college presultant, and other states, and many influential clergy—lish a permanent endowment fund for scholarships to be awarded in the sonality is taken from it. Neverthermonth means not only some wholes are attempting to out when some one commanding personality is taken from it. Neverthermonth means not only some wholes are attempting to out when some one commanding personality is taken from it. Neverthermonth means not only some wholes are attempting to out when some one commanding personality is taken from it. Neverthermonth means not only some wholes. month means not only some wholesome fan, and a boost to the community's pride—its high school—but,
in addition, an opportunity to get
expert cross sections of public
opinion that is rather unique.

This Fathers' Association is a sociation and the description of the association have pargirls during their high school capreers, in order that they would not

brary by subscribing annually to

magazines.

The Fathers' Association has resolutely refused to allow its meetings to be used as a place for a special plea of any kind. However righteous the cause, it finds no recognition by the officials of the association. It is absolutely non-sectarian, non-racial, non-political, non-everything. Its leaders steadfastly answer all pleadings for a hearing for this or pleadings for a hearing for this or that propagands with the simple answer that the association has and can have but one purpose, and that is to help the Frankford High

There are no cliques. By a wise provision the president of the association is elected for one year, and "shall not be eligible for re-election." "shall not be eligible for re-election.

Hence there is a constant infusion of new individualities, and a lack of that dreadful accumulation of official deadwood that means the ruin of many a similar organization.

This article could not properly close without a tribute to the prin-cipal of the Frankford High School, George Alvin Snook. The Fathers' Association is not a one-man insti-tution, doomed to run down and die out when some one commanding peropinion that is rather unique.

This Fathers' Association is tremendously alive and prosperous. It has a total dues-paying membership of about 2000 men, with an average attendance of about 800. It means much to some of the finest men in the community. It has won a national reputation. It is 13 years old, and

### THE MOTIVATION OF SPELLING

By CLARA HULBURT SMITH, Kensas City, Mo.

CIVIC SERIES - LESSON 8

The ancients who separated their residential and industrial districts escaped much of the harly-burly to which we are subjected. Petroleum and gypsum help to fill the "Equality State's" coffers. Surely her last gubernaterial choice vindicates her nickname. Whoever steers the motor without mishap deserves credit for bim-anous dexterity and binecular vision.

As the hammers in "conservation factories" wring livelihoods from debris, millions of ears are attuned to their rhythm. Fatalists and fanaties, loath to "keep their own counsel," are given wide berths, to use the common vernachlar. That never-dying vim is supposed to overcome obstacles was all that I learned from the day's lesson.

### The Social Motive School

New York, N. Y. Special Correspondence THE Social Motive School has for I its basic idea the doctrine set forth by Prof. John Dewey:

"The business of the educator, whether parent or teacher, is to see to it that the greatest possible number of ideas acquired by children and youth are acquired in such a

Here reading, writing, history, mathematics and natural sciences are but the tools with which the boys and girls prepare for life. These subjects are taught because of their usefulress in satisfying the child's natural interest in the life about him, the course of study being presented from the point of view of everyday factors of life such as food, shelter and clothing.

To use the phrase of the director.

Miss Bertha M. Bentley, "A great
deal of the work is tied up with the
course in industrial arts." This
subject is assuming a position of pre-eminence in the curricula of many progressive schools. The reason for this is presented in the introduction to Winslow's book, "Elementary Industrial Art." "A vast body of industrial information with being collected, organized, evaluated and crystallized into a new cchcol study, a study of industry from the social as well as from the material social as well as from the material side, a cultural study with the em-phasis upon the how and why of industrial operations, combined with a real appreciation of industrial life. The industrial arts point of view accepted, we shall see that for the purpose of organization most of the drawing, art, and construction work done in the schools will fall to the new subject of industrial arts, not rather because it is an industrial subject and because industry deals more directly with drawing and construction than do history and geog-

raphy. "The making in school of paper or of envelopes may be regarded as a good exercise, but the amount of good to be derived from such work is not to be compared with that gained through the mak-ing of these and other articles in connection with a study of the in-

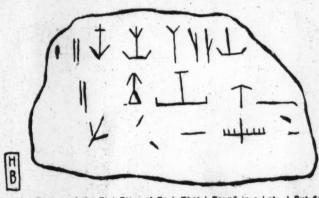

dustry which they represent.
"Elementary instruction in the in-dustries will create in boys and girls a sufficient interest in and knowledge of things industrial to enlarge their ability to appreciate and enjoy the works of artist, me-

chanic and manufacturer. . . . The subject matter involved in work of this kind is perhaps the most important consideration. The manual this as finely as possible. Then we work must be made valuable by beng subject matter directly related to the industries.

correlation of industrial arts with other subjects. The two grades work in one classroom. Their industrial arts course deals in part with a study of records, historical and modern methods of printing compared, the history of book making. Closely related to the study of primitive methods of printing is the school. The boys and girls are self-bittory of primitive methods of printing is the school. ## Enjoyment in Going to School

"In urban educational administration in Indiana there is decidedly more supervision than in the country. In the rural districts there is a supervisor for every 50 to 250 teachers, depending upon the size of the county. These teachers are widely scattered and therefore present an additional burden to adequate supervision. The township line could be completely ignored in the employment of assistants to aid the county of supervising the

#### WASHINGTON AMERICANS LEADING IN WORLD SERIES

Have Won Three of the First Four Games Played and Need Only One More to Defend the Title

swayed, then a spurt of dust was blown in the infield, only to turn and make a rush for the stands. The fans bundled up in overcoats and sweaters looked more like a group of football spectators witnessing a game between Harvard and Yale.

Weather conditions, however, did not affect the ardor and enthusiasm of Washington's loyal fans unless it was to increase it. It seems quite fitting at this time, when Washington appears about to capture its second straight world champlonship, to pay a great ribute to the fans of the capital city of the United States. Those spectators from other cities who witnessed Saturday's game and saw the tremendous ovation accorded the Washington and the standard for appreciation of the straight world champlonship, to pay a great ribute to the fans of the capital city of the United States. Those spectators from other cities who witnessed Saturday's game and saw the tremendous ovation accorded the Washington to team at every turn of the game. So well and Reuther, can give to Washington and preciate to a great extent why such players as Coveleskie, Perguson. Joseph Harris, Veach, Scott and Reuther, can give to Washington world on the series than they have been able to give the other clubs in the past two world washington uniform and fans who have been eye witnesses at the games in Washington uniform and fans who have been eye witnesses at the games in Washington uniform and fans who have been eye witnesses at the games in Washington during the past two years will place much of the credit for the team's success to the great sportsmanship and loyalty of the baseball public. It is certainly something more than been also do for the team's success to the great in the feel of the credit for the team's success to the great in the feel of the credit for the team's success to the great in the feel of the credit for the team's success to the great in the feel of the credit for the team's success to the great in the feel of the credit for the team's success to the great in the feel of the credit for

Johnson Pitches Shutout

Walter P. Johnson, veteran Washington pitcher and big favorite of the American baseball public, pitched Washington to a shutout vesterday, in the fourth game of the series. It was the first shutout made in a World Series game since A. N. Nehf of the New York Giants shut out the Yankees in the third game of the series of 1922 

\*Batted for Ferguson in 7th. †Ba for Kremer in 9th. ‡Myer out, hit batted ball.

Washington Bats Around

In this big third inning Washington batted around, making four hits and getting two bases on balls. It was the first real big inning of the series and Yde was taken out of the box to give place to Morrison. The Litter pitched was taken out of the box to give place to Morrison. The Litter pitched was taken out of the box to give place to Morrison. The Litter pitched was taken out of the box to give place to Morrison. The Litter pitched was taken out of the six men in the next two innings, but Washington began to get to him in the seventh and Adams, who pitched Pittsburgh to three victories in the World Scrieco 1999, was given a try.

In the seventh inning with Manager Harris on third base and Judge on first an unusual play was tried. It was merely another attempt on the part of Harris to outguess the whole Pittsburgh team and looked as though it worked although the umpire ruled different. Judge led far off first base to attract the throw and Manager Harris waiting for Morrison's arm to move in the direction of first base was off for home as the ball left the pitcher's hand. Grantham threw home at once and Gooch caught the ball late off for home as the ball left the pitch-er's hand. Grantham threw home at once and Gooch caught the ball late. The umpire ruled that Harris was tagged out but fans, it seemed were justly indignant.

off for home as the ball left the pitcher's hand. Grantham threw home at once and Gooch caught the ball late. The umpire ruled that Harris was tagged out, but fans, it seemed were justly indignant.

Manager Harris also deserves special mention for his fielding work in the game yesterday. He accepted 13 chances, sky putouts and seven assists, thereby tying the record for chances accepted by a second baseman in one game in a World Series, which was made by C. Ritchey of the Pittsburgh Nationals in the series of 1903, the first one ever played between National and American League clubs. Ritchey made five putouts and eight assists.

The one inning in which Washington scored yesterady was a contrast to any other in the series so far as hitting is concerned. With the exception of this inning, little heavy hitting at one time has been seen. Johnson, lead-off man, singled, but was caught trying to stretch it into a double. Rice, next up, singled, al-Totals .....31 0 6 6 24 19 1 a double. Rice, next up, singled, although Moore made a fine stop of his grounder. Marager Harris made first base when Wright fumbled his grounder, and Goslin, coming to bat, hit the first pitched ball into the leftfield stands on the bounce for a home run. Barnhart made a great try for it, and missed by inches, Joseph Harris caught the next pitched ball for a home run into the same stands, only this time the ball wat three quarters of the way up in the stands. Judge, the next man up, got a three quarters of the way up in the stands. Judge, the next man up, got a base on balls and Yde was immediately taken out of the box. ADAIR STARS FOR PROVIDENCE
BETHLEHEM, Pa., Oct. 12—Providence defeated Bethlehem Steel, 1 to 0,
Saturday afternoon in one of the slowest
American Soccer League matches ever
staged here. Adair, the visitors' outside
right, scored the only tally of the game
five minutes after the loopening of the contest taking a fair pass from Florie.
Adair made a clever run and placed the
ball accurately, completely outguessing
Carsen, Bethlehem's goalle.

MISS COLLETT WINS AGAIN MISS COLLETT WINS AGAIN
CHICAGO, Oct. 12 (P)—Miss Glenna
Collett of Providence, R. I., women's
United States golf champion, added another subordinate title to her collection
here Saturday when she defeated Miss
Helen Payson of Portland, Me., 5 and 3,
in the 18-hole final of the Indian Hill
Country Club invitation tournament.

BOSTON COMES FROM BEHIND PHILADELPHIA, Oct. 12—Three goals by Blair and one by Fleming, secored in the final half, gave Boston a 4-to-1 victory over the Newark Soccer Club in an American Soccer League game here Saturday. The locals led at half, time, 1 to 0.

ROYAL CANADIAN TEAM WINS ROYAL CANADIAN TEAM WISS TORONTO, Ont., Oct. 12 (Special)— The team representing the Royal Can-adian air force at Camp Borden de-feated University of Toronto in a Senior Ontario Rugby Football Union game here Saturday, 6 to 4.

of America. Baseball is not looked upon as an important school game by these young men and in many of their schools baseball is not played at all. However, they consider it a great honor to play on their school football or basketball team. As a result the colleges these days do not lack for good football material. There is probably more new good football material in the Conference this fall than ever before in the history of the 10 universities.

"From this it would seem that a sport can grow without the influence of the professionals, and I would like to go on record as saying that if the sport becomes highly professionalized, as baseball has, 25 years from now these beautiful stadiums that we are building will be no more useful than the ruined stadiums in Arles, Nimes, Rome, and Atheas. Football today is so popular that the universities cannot handle the crowds who want to see the games. Last spring, Mr. Stagg, at University of Chicago, admitted all spectators free to his baseball games. If anybody thinks that it is necessary for us to professionalize football in order, to create player interest, let him ponder these facts."

2—Conp. State. 7 20—Geneva ...12
7.—St. Stephens 6 72—Marietta ...0
0—Columbia. 61 40—Waynesburg. 6 77 132 TO HANDLE EAST VS. WEST GAME TO HANDLE EAST VS. WEST GAME EUGENE. Orc., Oct. 12 (Special)—
J. W. Benefield, graduate manager for University of Oregon Associated Students, will manage the East vs. West intersectional football game to be played at Pasadena, Calif., New Year's Day, it is announced. R. W. Cortelvou, graduate manager of University of California, was elected president of the association, but delegated the intersectional game work to Benefield. The Oregon manager will attend to all negotiations for an eastern team to meet the leading team of the west, and will make all arrangements for the game at Pasadena.

NEW BEDFORD TIED NEW BEDFORD TIED

NEW BEDFORD, Oct. 12—New Bedford did well Saturday to secure a 2-to-2
tie against the Brooklyn American Soccer League team. The playing of the
visitors was superior to that of the home
team, their passing and attack in the
face of a hurricume that blew across
the football bark being remarkable. But
for the excellent defense work of Shaw
in roal for New Bedford, the Brooklyns
would have won easily.

TORONTO DEFEATS OTTAWA TORONTO DEFFEATS OTTAWA
TORONTO, Ont., Oct. 12 (Special)—
The Toronto Argonauts defeated the
Ottawa Senators here Saturday in an
Interprovincial Union Rugby, game by
13 to 5, the visitors being scoreless until
the last seven minutes when they started
3 great plunging attack which progreased 70 yards and resulted in a touchdown. As a result of the local's victory
and Montreal's win, all four teams are
tied with a win and a loss.

YALE AWARDS MAJOR Y'S IN THREE SPORTS

INDIANA FASILY BESTS NEWARK
NEWARK, N. J., Oct. 12—The Indiana
Flooring soccer team defeated the
Newark team here vesterday afternoon,
4 to 1, in an American Soccer League
game. The winner scored three goals in
the final half. Nevark having held them
to a 1-to-1 tie at half time. Carlton,
Flooring center forward, was given
credit for the major part of the victory
by his fine team work, although he
did not score himself.

BOSTON PLAYS WELL
NEW YORK, Oct. 12—The Boston
soccer team defeated the New York
Glants here yesterday, 3 to 1, in an
American Soccer League game. The
visitors gave a fine exhibition and earned
their victory by superior play. Foy,
McNabb and R. Blair counted for Foston, while Crilley was the only scorer
for, the Glants.

Traynor. Carey made a double by exceptional base running. Washington any balls at hit they cannot be slow on any balls at hit by Carey. He moves like an express train Yesterday he bunted and made and they cannot be slow on any balls at hit by Carey. He moves like an express train Yesterday he bunted and made and made and they cannot be slow on any balls at hit by Carey. He moves like an express train Yesterday he bunted and made an

or plunger. This season he added pass throwing to his attainments and may prove valuable when the Maroons open up. Promise is shown by Stanley Rouse '27, who had some experience last year, but looks much better now. Kyle Anderson '28, though not as heavy as Rouse, shows indications of developing into an all-round half-back. Others are C. B. McKinney '27, 165 pounds and two years of experience; E. C. Duval '27, 189 pounds, in eligible last year; John McDonouch '28, 174 pounds who played end on the freshman team. D. Is. Yeisley '28, 180, and E. E. Fulton '28, 165 pounds.

Duval Is Brilliant

## Art News and Comment

## London Photographic Exhibits

ondon, Sept. 29. ODERN developments in photography have been exemplified to Londoners this autumn through three exhibitions covering various forms of the art. All three have been international in charac-ter and the occasion of the one hundredth anniversary of the dis-

hundredth anniversary of the dis-covery of photography gave unusual interest to them.

At the London Salon of Photog-raphy the catalogue states that "the aim of the London Salon is to exhibit only that class of work in pictorial only that class of work in percoral photography in which there is distinct evidence of personal artistic feeling and execution." That this aim has been achieved is clearly evident to the visitor, whether he is technically informed concerning the various forms of photography or

various forms of photography or not.

The salon exhibit illustrates the influence of Japanese art on photography, Many of the exhibits are strikingly Japanese in character, although taken by British, American or Continental photographers. Two remarkable storm photographes are shewn, one of a gathering thunder storm over the city of St. Petershurg, Fia. shewn at the Royal Society exhibit, and the other sunshine bursting through the clouds over the Thames in London, just as an airplane comes sweeping across the sky, at the salon.

At the Professional Photographers' Association exhibition of portrait photography, work is shown from Greaf Britain and America, Spain, Germany, Holland, Austria, Sweden, India, and Ceylon, Canada, Italy, France, Australia, and Hungary, While the British exhibit is much the largest and the United States comes second, there was a general agreement among visitors to the gallery that the Austrian exhibit was the most excellent. Certainly some splendid work was shown by all the nations, a rather unexpected feature of the American group being the

## Chas. Sims' Canvases in New York Arts and Crafts

By RALPH FLINT New York, Oct. 7 | search for pictorial truths. There PENING the new season at the gratiatingly to the eye on first be-knowler Galleries is a notable gratiatingly to the eye on first be-holding these works, many traits that group of paintings by Charles Sims, R. A. This well-known English deep preoccupation with the fasciartist thus makes his first American nating problems of light and shade. form and color. A winning and est-nest bloom comes off these canvases appearance in a one-man capacity after a considerable and distin-guished career in his own country, presenting as evidence of his art cer-tain portraits and studies, among tain portraits and studies, among nen'ly Mr. Sims', perhaps to be found in even greater measure in the many delightful, sketches of women and children which supplement the larger which is the much-discussed likeness of King George V of England, origirooms of the Royal Academy and since banished from that august mansion as not sufficiently representative of His Majesty's person. Ever since this full-length portrait was first exhibited at the Royal But where this painter fails to keep pace with the problems before him is in the establishment of what Whistier so insistently strove for in his painting, in creating of the "enwas first exhibited at the Royal Academy, it has apparently been the center of open criticism, so much so that after hanging for a year in

company with the other portraits of British sovereigns at Burlington House it was removed thence at the express request of the King. At first sight this portrait makes a brave showing, with its blacks and reds and gold scattered over the white expanses of the large canvas, arched background decidedly at odds. "royal" portrait; with the much berobed figure of the monarch seated upon a crimson dais with golden instruments of office clustered about him, while overhead there is the glimpse of column and looped curtains that invariably according to the structure of the continuous and looped curtains that invariably according to the structure of the same and looped curtains that invariably according to the same and looped curtains that invariably according to the same and looped curtains that invariably according to the same and arched background decidedly at odds with the loosely painted flesh and tissues of the costumes. If it had all gone as swimmingly as the freshy painted likeness of the little I boy so happily engaged on his with the loosely painted flesh and tissues of the costumes. If it had looped upon a swimmingly as the looped with the loosely painted flesh and tissues of the costumes. If it had looped upon a swimmingly as the looped upon a swi the expanses of the large canvas, it comes upga the sight an obviously with the loosely painted flesh and converged to the cost times. It is had all some as swimmingly as the probed figure of the monarch seated all some as swimmingly as the probed figure of the monarch seated all some as swimmingly as the probed figure of the monarch seated and painted likeness of the little stream of the probed figure of the monarch seated there is the glimpse of column and looped curvature as very complete summary that the probed figure of the monarch seated with some pictures bought in the glimpse of column and looped curvature as very complete summary that the probed figure of the monarch seated with some pictures bought in the glimpse of column and looped curvature as very complete summary call filed of the Reinbragdis Society, the famous Oldenburg collection of the artists talents, for the formal term worked out with these pictorial confolned in pose and characterization on the whole, but a closer inspection of His Majesty or, any contribution of the whole, but a closer inspection of His Majesty or, any contribution for time, and while the head is solid, the actual painting of the portrait; significantly and interest nor a beguiling passage with the brushes. In fact, adventure is a significant of the brushes. In fact, adventure is a significant of the brushes. In fact, adventure is trait study of Lord Ballour in the brushes. In fact, adventure is trait study of Lord Ballour in the brushes. In fact, adventure is trait study of Lord Ballour in the brushes. In fact, adventure is traited by the fact of the brushes. In fact, adventure is trait study of Lord Ballour in the brushes. In fact, adventure is trait study of Lord Ballour in the brushes. In fact, adventure is trait study of Lord Ballour in the brushes. In fact, adventure is traited by the policy of the passed, certain objects and the provided passed in the contract of the passed in the provided passed in the provided passed in the provided passed in the passed in the p

caused by the too elegant and dancing-master legs that have been given the King. He is seen dressed in the robes of the Garter, wearing the regulation white knee breeches and hose, and appears a rather innimate the content of series of mother-and-child subjects, mostly done in a sketchy way and somewhat lackadelsical person. and somewhat lackadaisical person-age. This impression is further enage. This impression is further enhanced by the long, sloping lines of the heavy robes of office as they descend from collar to hem, giving a sort of Fujiyama slihouette to His Majesty's shoulders and very much dwarfing the head that only half surmounts the apex of the royal robes. As everyone versed in the painting of state portraits knows, sittings are not often as available as the artist might desire, and the as the artist might desire, and the as the artist might desire, and the conceits than when called upon to do the handsome thing by pomp and as the artist might desire, and the conceits than when called upon to do the handsome thing by pomp and as the artist might desire, and the as the artist might desire, and the painful substitution of models and lay figures has ruined more than one In figures has ruined more than one brave attempt at personifying people of high rank and of little leisure. The Sargent partrait of President Eliot of Harvard is one outstanding example of such discrepancy, and it is obviously true in the case of the is obviously true in the case of the Sims portrait that the artist was, perforce obliged to put up with such substitutes for the kingly presence as the London studios might pro-

Mr. Sims has brought over two other large examples of his portrai-ture one the well-known likeness of the Marchioness of Cholmondeley with her young son, the other a dig-nified study of Prof. Matthew Hay. Each of these canvases bears witness to Mr. Sims' talents, the Cholmonde-ley group in the way of his longestablished facility in developing the mother and child theme, the Hay portrait in the light of his ardent

"queer" and "peculiar" during his ticularly so if he gives us such lifetime that make him such good subject matter for an imaginative the new comody at the Maxine Elmont every light the such as the new comody at the Maxine Elmont every light the such as the new comody at the Maxine Elmont every light the such as the

of that artist. Yellow the Oriental precedent, his Vene-tian training, his life in old Toledo, his "love of excessive ostentation," pictures themselves, the colors and draperies, what curious and fascinating associations! Was his brush intentionally incorrect? Did he consciously seek the bizarre? The art world is filled with El Grecan enthusiasts and critics. Every bit of new literature that appears on the subject of El Greco is welcome, espe-

on. The Hispanic Society of America has recently brought out a mono-graph on "El Greco" by Elizabeth du Gue Trapier. The author makes no effort at a solution of the enignatic problem of El Greco, but shows an interest in the temperament of the artist and the effect of his life and surroundings upon his paintings. First, there were the early days in Venice when some of his work could

passed, certain obtrusive and almost painful facts crowd through the many individual bits which show Mr. Sims the skillful artist that he usually is.

The temporary downfall of the Sims canvas is said to have been caused by the too elegant and dancard tangents. There are many delightful examples of the artist's long preochamples of the artist's powers of character. These pictures make a welcome and needed addition to the not extensive collection of early Italian masters owned by the museum. The funds required for the purchase were raised by the entrance fees. It is expected that in future more large large large and artist that he was a welcome and needed addition to the not extensive collection of early Italian masters owned by the museum. The funds required for the purchase were raised by the entrance fees. It is expected that in future more large large and not merely toward æsthetic manner is a welcome and needed addition to the not extensive collection of early Italian masters owned by the museum. The funds required for the purchase less struggle of thought and belief of the day. Mannerist that he was develomed and not extensive collection of early Italian masters owned by the museum. The funds required for the purchase less struggle of thought and belief of the less struggle of thought and belief of the less struggle of thought and belief o Greco have painted thus without the stimulating life of Toledo before him? Could he have painted thus if he were Spanish born?

Elizabeth Trapier does not solve the problem of El Greco, but she pre-sents much information that is sympathetic and illuminating to the admirers of his genius. A bibliography, a list of the artist's works and several illustrations give the volume value as a text and source book.

New York, Oct. 9

Special from Monitor Bureau

The first week in October finds the art galleries stepping into line. The special exhibitions to date run to 10—that is, if it be permissible to count the various offerings at the Art Center as a single unit; and of course the Bellows Menorial exhibition that one personal note to his findings to keep them distinct from the many, many versions of boulevard and bridge, of quaint old village and sunit sea that have come from the various land-sunit; and of course the Bellows Menorial exhibition that one as a single unit; and of course the Bellows Menorial exhibition that one as a single unit; and of course the Bellows Menorial exhibition that one as a single unit; and of course the Bellows Menorial exhibition that one as a single unit; and of course the Bellows Menorial exhibition that one as a single unit; and of course the Bellows Menorial exhibition that one as a single unit; and of course the Bellows Menorial exhibition to the artist's exhibitions to distinguished note or two. But he material, and gives a sufficiently personal note to his findings to keep them distinct from the many, many versions of boulevard and bridge, of quaint old village and sunit sea that have come from the various landscapes are interesting, and of course, should not be the case, or should be made, if quaint old village and sunit sea that have come from the various landscapes are sufficiently personal note to his findings to keep them distinct from the many, many be the case, or should not an investigation of the sufficient form the many, many be the case, or should not an investigation of the case, or should not an investigation of the sufficient form the many, many be the case, or should not be the case, or should be made, if bleau vogue came to an end. His canvases remain curiously Amer-ican, which is just so much to thismorial exhibition that opens at the Metropolitan Museum next Monday will be sufficiently important to put will be sufficiently important to put the present art season on schedule as completely and formally open. These columns have already carried to shape and color to sh apt to shape and color a young painter's art along the lines of whating of eighteenth century prints at Keppel's and the exhibition of the ever may be the fashionable creed of the day. Mr. Warshawsky's painting is of a compactly organized and Sims paintings just opened at Knoedler's. literally projected sort. A number

Running down the list of other exhibitions to be considered, we come upon the seven-branched showing at the Art Center, the lively landscapes of W. J. Potter at the Dudensing Galleries, the paintings by Robert W. Satterfield and pottery by Varnum Poor at the Montross Galleries, the sculpture group at the Ferangil Galleries, the paintings by A. G. Warleries, the paintings by A. G. Warshawsky at the Reinhardt Galleries, the etchings of James McBey at Knoedler's, the block-printed textiles Another interesting section is that devoted to the New Forest, with etchings by Haywood Sumner, which y Gilbert Fletcher at the Arts and rafts, and the interesting collection of old star maps and astronomical charts at the Weyhe Galleries, surely a sufficiently varied fare for anyone just starting in a season of gallery-

The Art Center has officially opened its fourth year with the combined exhibitions of its seven co-operating cieties, now for the first time oper ating under the head of a general director. Alon Bement, the first in-cumbent of this new post now made possible through the generosity of John D. Rockefeller Jr., addressed the guests who attended the formal opening of the exhibitions this evening. The position of honor in the large gallery has been awarded this Year to the Society of Craftsmen, and a diversified array of American craft-work has been arranged to suggest the drawingroom of a large house. Furniture, pottery, glass, ironwork, rugs, tapestries, needlework, hilver. rugs, tapestries, needlework, kilver, he is the gainer in arresting design enamels, wood carvings, sculpture, and brilliant color. stained glass, etc., either original or in adaptation show the wide-ranging talents of this body of workers.

The Art Alliance, under the new direction of Helen Appleton Read, has redecorated its galleries for the occasion, and brought to its cheering an earliest dering matters of form and color, and of an abiding willingness to put the modern theories of pictorial dynamics occasion, and brought to its cheering in the color, and of an abiding willingness to put the modern theories of pictorial dynamics or a full test. He is definite in his occasion, and brought to its cheerful, pinkish walls a most delightful collection of contemporary Amercian water colors. Such masterful painters in this medium as Edward Hopper, W. Emerton Heitland, Charles Demuth, George Hart-and Charles Burchfield, Mahonri Young, Lars Hoftrup, Sandor Barnath, Albert W. Heckman, Predium, Tompiles bert W. Heckman, Bradley Tomlin, and Stan Wood are among the other exhibitors. A most worthwhile gathering of the water colorists and a credit to the Art Alliance. The American Institute of Graphic Arts has arranged a most comprehensive and instructive exhibition of "Paper and Paper Making." The Art Di-rectors' Club, the Stowaways, the Society of Illustrators and the Pictorial Photographers of America are also exhibitors in the galleries.

The Warshawsky canvases are fresh from Paris, where this Amer-ican painter enjoys a considerable reputation. He follows faithfully in Company of 100 - 30 Dancing Girls 60-Male Chorus-60 Curtain at 8:10 the steps of the French landscapists who have trudged these many years

### STEEL DEMAND SHOWS STEADY IMPROVEMENT

All Factors Favorable to **Producers Except** Prices

NEW YORK, Oct. 12 (Special)-The good behavior of the leading steel hares on the Stock Exchange again has called attention of the business

world to the steel industry.

world to the steel industry.

Virtually all factors are favorable except the matter of prices, and it is felt that these will soon take care of themselves inasmuch as demand is increasing steadily.

There is not an item in the long list of steel products, with the exception of tin plate, pipe and rails, which is irringing prices that are admitted as satisfactory by the steel makers.

Prices cannot go higher as long as the short range character of buying prevails. Without appreciable backlogs of orders on books the steel makers do not dare to run the risk of losing immediate business by boosting quotations.

Production is increasing at a steady galt. Steel ingot production in September was 2 per cent better than in August, and August increased 11 per cent over the preceding month. The output for September was the largest since April, with a total of 3,482,904 tons, making a yearly rate of 41,780,362 tons, capacity for the country being regarded as 54,000,000 tons.

Blast Furnace Output

Blast Furnace Output Blast furnace output is gaining apreciably just now. There had been a

ably sell at \$2 or \$3 a ton higher but for the foreign iron which constantly invades the Atlantic seaboard.

Structural steel in fabricated form is perhaps the most active of the common grades of steel. Awards for the last week for which figures are available were 56,000 tons, and there are a dozen inquiries pending of 1000 tons or more each. Of most interest was the inquiry for 25,000 to 30,000 tons for what will prove to be the largest office building in the world, to be constructed in the Grand Central district of New York.

Structual Steel Weak

#### Structual Steel Weak

It is strange that plain structua ne good defining the free garlized price is 30c a pound. Pittsburgh, sales have seen made in the East as low as 1.75c, steel plates are perhaps the weakest teel commodity. The price is supposed o be 1.70c, which is too low by com-

steel commodity. The price is supposed to be 1.70c, which is too low by comparison with bars at 2c, yet the American Locomotive Company bought 2000 tons at 1.65c. On the 75,000-ton plate order for a pipe line projected at Oakland, Calif. a price of 1.50c came out, though that would naturally commanda low price because of the immensity of the tonnage.

American makers are losing out in business with Japan. Thus 1500 tons of heavy rails, which would normally come to American makers, were booked by a European maker at \$6 under the American price or \$33, delivered in Japan. Black sheets, which were formerly one of the main export commodities to Japan, are now being manufactured at Kobe, to protect which a high tariff has been proposed. which a high tariff has been proposed, thus doubly shutting out the American product. Americans formerly furnished 100,000 tons of sheets annually to that

100,000 tons of sheets annually to that country.

Buying by the railroads continues in full swing. Freight cars ordered in September amounted to 7906. Prospects are that 1,500,000 tons of rails will have been bought this fall for 1926 delivery. The largest current inquiry comes from the New York Central for 175,000 tons, bids on which will be opened Oct. 21.

Locomotive Orders

Linfilled orders for locomotives on

same direction.

Both zine and tin climbed into new high ground during last week. The former made a net gain of \$3 a ton to \$3 a ton to \$3 a ton to \$4 a ton to \$4

September, and a gain of about 12
stacks is counted on for October.
Steel bookings are heavier in the middle west than in the east, which is 'the usual condition during a revival in the industry. Naturally, prices are stiffer west than east, but as the west becomes filled with orders the cast will find less competition, and Pig rion is now stronger than the majority of finished steel products. The only definite advance during the week took place at Birmingham, where makers are getting as high as \$21 a ton.

An encouraging development was the coming into the market of the American Radiator Company for 10-70 to 10,000 tons for first-quarter delivery to its plant at Bayonne, N. J. that company having the expetition of being able to gauge the correct time to buy.

Pig iron sales have halted to some extent, but the makers are well booked ahead. The eastern Pennsylvania iron producers are usually booked for the rest of the year, and mices are firm at \$21, with some assing \$21.50. Eastern iron would probably sell at \$2 or \$3 a to higher but for the foreign iron which constantly nyades the Atlantic seaboard.

Structural steel in fabricated form is perhaps the most active of the common grades of steel, Awards for thest week for which figures are available were 56,000 tons, and there are dozen inquiries pending of 1000 tons what will prove to be the largest structed in the Grand Control to the word.

Locomotive Orders

Locomotive Orders

Unfilled orders for locomotives on Oct. 1 were 363, compared with 309 on Sept. 1 and 386 engines on Oct. 1, last year. Shipments last month were 34, which has been the average monthly shipments over the year. Of these 94, 44 were for export.

The jobbers are doing a spotty business, good one week and rather poor the next. Best demand is for building steel, as contractors are rushing operations before cold weather sets in Philadelphia jobbers reduced prices on cold-finished steel \$2 a ton.

The grain in unfilled orders of the Sieel Corporation, amounting to 204,494 tons, was larger than expected, and the first increase since February. With pig iron and steel Ingot output increasing all indicators now point in the same direction.

Both zine and tin climbed into new high ground during last week. The Last chage 585 +5 555 +30 255 595 +5 755 +3 570 88

CUSTOMS RULINGS

PRICES HOLD FIRM

SHOWS GAIN OVER

OTTAWA, Oct. 12 (Special)—Continued improvement in business in Canada is apparent. Reports from all sections of the country are highly encouragine, and taken altogether the commercial situation is fundamentally continued in the commercial situation is subject to the comme plus of funds for which there is in-sufficient legitimate commercial de-mand at present. There is still much room for the broadening of business. General demand for iron and steel supplies is good, Buyers are demanding carly deliveries, and makers and job-mers, forced to be the stock-carriers, are preparing to supply anything at a moment's notice.

Non-Ferrous Metals Up Movements worth noting in the metal market quotation were confined last week largely to the ingot non-ferrous lines, where considerable strength has developed. Tin reached a new high point for the year, being quoted at \$62 in Toronto and \$61 in Montreal.

Montreal.

Copper, spelier and lead have allvanced. Old material prices fluctuated somewhat, but settled at the point
where agitation began. Demand for
sheets and plates from warehouses
was reported active at Montreal. Lead
sheets were 25 cents higher in Toronto.

Earlier estimates of abundant crops Earlier estimates of abundant crops throughout the Dominion have been largely fulfilled, and yields, taken as a whole, are considerably better than for several years past. The 1925 wheat crop of western Canada is placed at 400,385,000 bushels in an estimate just released by the Northwest Grain Dealers' Association. This figure is based on an estimate average of 20.1 bushels to the acre on 19.585,500 acres.

In the prairie provinces harvesting

In the prairie provinces harvesting perations were started earlier than ast year, and deliveries of wheat by last year, and deliveries of wheat by farmers since the beginning of August have been more than double those of last year during the corresponding period. Grades so far are better. The yield generally is considerably above last year's but lower prices will partly offset increased yield and better grade.

Good Quebec Crops In Quebec Province the crop yields have been the best for five years, although wet weather during the harvesting has lowered the quality to some extent. In Ontario the farmers

have been the best for five years, although wet weather, during the harvesting has lowered the quality to some extent. In Ontario the farmers have had a very satisfactory year. In eastern and northern Ontario, the best crop in years has been harvested, while other sections produced a good average crop.

In the Maritime Provinces the crop returns generally are very satisfactory, except for apples. In British Commission crops in general have been somewhat below average.

Government figures for the first six months of the present fiscal year show gratifying buoyancy in customs recipts and lower ordinary expenditures. Total expenditure for that period was \$129,748,274, compared with \$136,385,123 during the corresponding period a year ago, while the revenue from customs totaled \$63,252,653, compared with \$54,705,388.

Ouring September the total net debt of the first six fined chiefly to twills, sateens and the Appring September the total net debt of the Government cotton report last week in much the same way as at the times of previous similar reports. Despite the benumbing effect of such reports, the total sales for the week far exceeded expectations, and is figured at approximately \$5,000 pieces.

Small but nevertheless general improvement in the local textile situation has become apparent, although the cloth sales figure does not indicate in the local textile situation has become apparent, although the cloth sales figure does not indicate in the local textile situation has become apparent in the local textile situation has become apparent in the local textile situation has been closed for long periods starting portions of their plants with hopes of extending operations shortly. Other mills are extending their operations.

Business during the week was compared with \$54,705,388.

from customs totaled \$63,252,683, compared with \$54,705,388.

Ouring September the total net debt of the Dominion decreased by \$7,321.—

\$71. It now stands at \$2,359,601,729, as corpared with \$2,366,923,600 cm Aig 31 this year.

Bank Clearings Improve

Another indication of improving conditions in the industrial field is found in a statement just issued by C. G. Piche, chief provincial forester of, the province of Quebec, to the effect that between 20,000 and 25,000 men are expected to work in Quebec forests this winter. Mr. Piche anticipates a very good season in pulp and paper products.

Business during the week was confined chiefly to twills, sateens and the 25 and 36-inch, low count style of goods. Practically all contracts were made for quick delivery.

Prices hold generally very firm. Quotations for the week are as follows: 38½-inch, 56x44. 8 cents; 27-inch, 56x5c. 6½ cents; 39-inch, 56x44. 8 cents; 27-inch, 56x5c. 6½ cents; 25-inch, 56x 44, 47% cents and 4.87 sateens, 12½@ 13 cents.

CHINA GOOD MARKET

FOR IRON AND STEEL

WASHINGTON, Oct. 12 — Despite the unsettled political and economic.

Improvement over the corresponding week of last year is shown in bank clearings reported by Canadian centers for the week ended Oct. 8. Montreal shows an increase of \$1,311,212, Toronto an increase of \$1,300,000. and Juniper an increase of \$15,000,000. Toronto clearings were the highest in the Dominion at \$110,123,215.

An analysis of Canadian bond sales up to Oct. 3, 1925, shows a total of \$428,444,205. compared with \$508,000,000 in: 1932. These are classified as follows: Government, \$252,878,333; municipal, \$35,742,885; corporation, \$93,060,000, and railroad, \$41,752,987.

Of the total there were sold in Canada, \$190,720,872; in the United States, \$207,745,000; and in Great Britain, \$27,918,333. Improvement over the corresponding

#### BIG FRENCH LOAN IS

NEW YORK, Oct. 12 (P)—Pankers here who have been in close touch with the situation growing out of the Franco-American debt settlement question are of the opinion that it is unlikely France will obtain any large loop in the United States this year.

It was stated today that had the debt funding negotiations at Washington been entirely successful the next step would have been an attempt to arrange a loan but that the failure automatically terminated even the informal loair discussions which had been proceeding by cable between American bankers and the French officials.

OMNIBUS CORP. OF CHICAGO

Revenue passengers carried by three

Revenue passengers carried by three subsidiary operating companies of Omnibus Corporation of Chicago for September totaled 13,847,570, compared with 10,669,193 last year, an increase of 3,-118,377, or 29 per cent and for nine months 118,381,633, compared with 90,-661,737 in 1924, an increase of 27,719,916, or 30 per cent. PITTSBURGH, Oct. 12—The coke production in Connelisville district during the week ended Oct. 3 is estimated at 125,530 tons, an increase of 2300 tons over the preceding week. Quotations: Spot furnace, \$3.60 to \$4; spot foundry, \$4 to \$4.50.

#### SHOE DEMAND HOLD CONVENTION STEADY WITH LEATHER EASY

Novelty Footwear Active-Industry Adopting Improved Methods

The tenth annual convention of the Financial Advertisers' Association will open on Wednesday, Oct. 14, at Columbus, Ohio.

An informal luncheon for ex-presidents of the association is planned for the first day, at which E. H. Kittridge, president of the association, will act as chairman.

Advertising and financial interests of Columbus are invited to hear a prominent investment house speaker

Union Leather Quiet
Union tanned sole leather was quiet except with the smaller lot buyers.
Large dealers have been bidding too low for tanners to consider. Choice packer native steer backs were quoted at 46648c. Medium weight, with packer cowbacks included, were listed at 43646c. Heavy selected bends were quoted at 56658c. The entire stock market averaged weak, contrasting strongly with the strength apparent in offal.

The call for union offal continues active. Prime shoulders are selling freely at 26628c, with closely selected lots booked at 36c. Bellies are selling at 21c, extra choice bringing 22c. The better heads move at 14c. Offal is sold up, even to expected receipts. Union Leather Quiet

PRECEDING YEAR manufacturers and jobbers in the Northwest shows business volume, both immediate and for the year, increased over 1924, with prospects of further; gains. Price advances have been small except in leather and rubber, up 25 per cent to 50 per cent. Merchandise in interior points has been moving in better volume. Stocks are smaller and in good condition.

Sales of furniture and stoves thus far this year, according to R. G. Dun & Co., show increases of from 15 per cent to 40 per cent. Prices have decreased slightly.

Local retail business, principally among department stores, is about the same as last year, with prices about the same or a little easing off with increased demand for more popular priced merchandise. No unusually large increase is expected.

Other changes noted are increases of 5 per cent to 15 per cent in distribution of hardware, butcher supplies, mechanics' tools and cutlery with prices about the same.

There is a slightly decreased volume in wholesale electrical and radio supplies mechanics' tools and cutlery with prices about the same.

There is a slightly decreased volume in wholesale electrical and radio supplies with a better margin of profit. Plumbing and heating supplies are expected to well freely after crops have been moved. Prices are about 5 per cent lower than last year. hetter heads move at 14c. Offal is sold up, even to expected receipts.

Though the demand for calf skins continues dull, prices remain unchanged. Choicest of plump skins are listed at 50c, with the regular run offered at 44@48c. Medium selections, all weights, 30@40c. Blacks now appear in the quotations at even terms with colored. Ooze calf is dull. Top grades are obtainable at 54@58c, mediums 42@28c. A lot of the cheaper sort sold at 25@33c. Some markets are having an improving demand for coze calf in colors, Philadelphia dealers reporting quite a movement in all grades.

Upper Leather Call Stendy Upper Leather Call Steady. Tanners of side upper leather say that the call for the medium and cheaper grades of all tannages is steady, though not large, but the top selections move slowly. Elk leather is active in the lower grades which are bringing 16@24c: medium sort 26@36c, with the choicer class listed at 32@34c.

Top selections of full grain chrome colored sides, are quoted at 28@22c, accords 22@26c, cheaper sort 18@26c, which is practically sold out. Black throme sides now bring about the same prices as colors. Bark and combination tannages are not very ac-

same prices as colors. Bark and combination tannages are not very active. The better selections are offered at 23@26c. The lower grades are quoted at 17@22c. The call for buck is quiet with No. 1 grade offered at 34@40c; cheaper selections 24@30c. The call for lining splits is fairly active, so prices are firmer. Top grades of grain finished lining splits are moving at 12@14c, prime seconds 10@12c. Colored splits, used by slipper manufacturers, is selling, in the better grades, at 14@16c, with a fair per manufacturers, is selling, quality moving freely at 12@14c Splits for export are having a steady demand, August foreign consignments about equaling those of a year ago.

about equaling those of a year ago.

Patent Demand Modersie

There is a moderate, but steady call for patent leather, but as in other upper leathers the medium and lower grades get the bulk of it. Selected chrome patent sides are quoted at 3862 42c; medium selections 30635c; cheaper quality is offered at 18628c. Bark tannage is slow of sale, top grades quoted at 24620c. Medium and lower sort offered at 16622c.

Sheep skin tanners complain of the mediocre selections of the buyers although new business is steady. Colored grain sheep skins, top grades, are offered at 16622c, medium siled 15c, with the lower grades moving at 7200c. Russets, better selections, are listed at 16628c, seconds 10615c, with the lower grades selling at 669c. Top selections of skivers are obtainable at 13621c, medium grades 9612c, cheaper lots quoted from 668c. Glazed blacks, are quoted for the top grades, at 14621c, seconds at 10612c. Lower sort at 5629c. The demand as a whole is sort of draggy, and the price trend easy.

New business in glazed kid is com-

5@9c. The demand as a whole is sort of draggy, and the price trend easy.

New business in glazed kid is coming daily, with the demand widening. Prices rule firm. The better selections in the active column is a prime medium selling at 40@55c. A grade offered at 22@35c is moving well, which may also be said of the cheaper skins, ranging in price from 10@20c. Black skins are held at prices close to that asked for colors, especially so in the medium and lower grades.

## HAYES WHEEL TO

NEW YORK, Oct. 12-Hayes Whee NEW YORK, Oct. 12—Hayes Wheel Company directors will soon authorize retirement of first mortgage gold bonds, leaving the company free of funded debt. Outstanding bonds amount to \$574,000 out of an issue of \$1,750,000. The entire issue will have been retired from earnings the past two years. This year about \$1,000,000 of bonds will have been redeemed. Retirement of first mortgage bonds will leave \$1,838,200 7½ per cent preferred and 197,044 shares of common the sole outstanding capital liability.

HIGHER TELEGRAPH CHARGES PARIS, Oct. 12—A.10 per cent to 30 per cent increase in transit and terminal charges on all classes of messages has been agreed to by the International Telegraph Congress, despite strong British opposition, with American moral support.

ROCK ISLAND'S LOADINGS Chicago, Burlington & Quincy handled in the first seven days of October 42,334 banks which bought gold from Bank of october loaded 37,786 cars, compensed arts, compared with 47,333 in England had difficulty getting insurance, the like period of 1924.

#### NEED TO EDUCATE PUBLIC TO MAINTAIN FOREIGN FINANCING

作れてもの部門のようにもかみれたされて調整といめまいかけがいは動いてもがあるとするは一部というとかけるといるのとかものとからはないからなっているというと

NEW YORK, Oct. 12—The present volume of foreign bond sales in this country can be maintained only by educating our investment public and stamping out unreasonable prejudice toward foreign countries. Steel Mitchell, of Hayden, Stone & Co., told the Conference on Foreign Investments in the governor's room of New York Stock Exchange.

"During this year," said Mr. Mitchell, "we have been absorbing foreign issues at the rate of \$100,000,000 or more per month, in fact so rapidly that many are inclined to feel this distribution presents no problem at all.

"But we have now reached the point where continuance of present volume of distribution is dependent largely on our ability to stamp out an unreasonable prejudice and indifference toward affairs of foreign countries and their securities. I believe it is safe to say the immediate trend of world affairs will be greatly influenced by attitude of our American investors toward purchase of foreign securities."

### NIZAM 'ANNEXES' FEUDAL STATE

Rani of Samsthanum Urges Her Claims, but Release · Is "Postponed"

Sole Demand Light

The demand for oak tanned sole leather, last week, was rather light with an easier trend on sizable lots. Choice tannages of oak backs, tannery run, were offered at 45@48c. Ordinary tannages were quoted at 38@42c. Heavy choice finder's bends sold at 45@50c. Selected oak backs, sold at 45@50c. Selected oak backs, sold at 45@50c. Selected oak backs, sold at 45@50c. This branch of the sole leather market proved favorable to buyers of quantity.

Offal conditions differ from whole stock in that prices are firm, and stocks well sold up. Standard rough double shoulders move readily at 40@42c; seconds 35@40c. Secured single shoulders move readily at 40@42c; seconds 35@40c. Secured single shoulders are firm, at 25@35c. Selected bellies are strong and active at 22c for the untrimmed and 25c for the close trimmed of the better tannages, Heads are also much firmer ranging from 14c up to 16c.

Union Leather Quiet

The demand for oak tanned sole leather, last week, was rather light

BOMBAY, Sept. 10 (Special Correspondence)—A great agitation is taking place in south India for the restoration of the Gadwal Samsthahum, a Hindu feudatory state of the Misam of Hyderabad, the biggest Moslem state in India, to the Rani (queen) of the late Maharaja, who was, according to Altchison, "practive active active

The rajah passed away last year leaving a widow and two daughters, minors, and the absence of a son to succeed to the Gaddi (throne) led the Nizam to take over Samsthanum to be administered by his own Court of Wards. The Rani (queen) submitted a memorial to the Nizam urg-ing her claims as the successor, and pleading that she could well be per-mitted to manage the state, as she was educated and was old enough. Thereupon the Nizam issued a fir-man directing that "the valence and man directing that "the release and confirmation of Samathanum be postponed till a son is born to either of the daughters and has reached the

age of 21 years."

The Hindus in South India viewed this decision of the Nisam with great concern, as it meant the practical annexation of Samsthanum for an in-definite length of time, if not forever. Public meetings have been held in different places in the Madras Presidency to call attention to the "injustice" of the Nizam's order, and a memorial has also been sub to the Nizam by as many as 45 mem-bers of the Madras Legislative Council, among whom were representa-tives of all sections of the Hindu community, pleading for Samstha-num to remain under the administration of the rightful Hindu ruler.

Women Sign Memorial A number of women, European and Indian, have also addressed a memorial to the Nizam asking for the restoration of the Gaddi to the Randi of the late Maharaja, who, the me-morial states, is a cultured and en-lightened lady. The memorialists submit that there is no legal dis-qualification for female heirs to suc-ceed to the Gaddi of their husbands, and they quote instances in Sams-thanum itself where the Nizam's Government has readily recognized the right of female heirs to succeed They point out that, according to the Hindu law and usage, and also to the last wishes of the Maharaja, the widow, Rani Adi Laxmi, being his sole heir, is entitled to succeed to the Gaddi.

The signatories include Lady Sadasivalyer (wife of a high cour judge), Eleanor McDougall, principal, Women's Christian College; Prof. I. T. McNair, Prof. Dorothy Renshaw

have given a stimulus to retail buying of clothing, shoes and other apparel, and spurred the buying and production of soft coal.

Despite some interruption to country trade and to seeding of winter wheat, the general effect has been beneficial to quibbing and wholesels trade which

to quibbing and wholesale trade, which seems to have thrown off the hesitation noted last week, and to be better than a year ago at this date. A feature of retail trade also has been the frequent mention of "sales" at retail, rather early in the season, it would seem.

seem.

Intensive advertising has seemed to bring about a good distribution of these goods but several markets report department store trade as chiefly benefited, small neighborhood conted, small neighborho cerns not getting as much business.

#### RETIRE ITS BONDS SLOSS-SHEFFIELD UP ON EARNING POWER

appear to be predicted on the hope of an early increase in dividend, but on the company's unusual earning power and the better prospects for pig iron. These factors will sooner or later be translated into dividends.

Sloss in the first nine months of the year earned about double the common dividends of \$4.50 a share for the period. Pig iron was selling in the south at \$17.50 to \$18 a ton over mucn of this period. Iron is now \$20 in the south and likely to go higher.

Sloss-Sheffield's September shipments set a new record. If the price of \$20 can be maintained and shipments keep up at the September rate, Sloss should show earnings of between \$2 and \$3 a month on the common.

Sloss has advantage of being an unusually low cost producer. It is probably the lowest in the country and able to earn dividends when many others are hardly paying overhead. the company's unusual earning power

### VICEROY REPLIES TO MILL OWNERS

Bombay Cotton Men Dissatisfied With Attitude of Lord Reading

BOMBAY, Sept. 10 (Special Correpondence)-If the fair crop in India, which seemed assured this year, materialized, then the end of one of the main troubles of the cotton in dustry was in sight, said Lord Read-ing, in the course of his reply to the deputation of millowners from the Bombay Presidency, who waited upon him recently, in order to put before him some of the disadvantages under which that industry is

aboring at present.

The Viceroy pointed out that the The Viceroy pointed out that the textile industry throughout the entire world was experiencing difficulties. Both English and American industries had been obliged to adopt short time, while from Japan came loud complaints of the rise in the cost of living, which sooner or later must affect the rates of wages. He thought the cause was to be found in the fact that the price of cloth was still out of relation to the prices of other commodities. It was twice as other commodities. It was twice as high as it had been before the war. Yet the Indian market was absorbing the same quantity of cloth, hence the increasing stocks, which were an

BOMBAY, Sept. 10 (Special Corre- embarrassment to the millowner. The Government had considered spondence)—A great agitation is taking place in south India for the plea for the abolition of the cotton excise duty, but it was impossible to grant this request in the midnum, a Hindu feudatory state of the Nizam of Hyderabad, the biggest were fully known. Only at the time of the next budget could the situa-tion be reviewed and a proper esti-mate formed. The duty would be abolished as soon as financial con-

siderations permitted.

Regarding the deputation's proposal for anti-dumping legislation against Japan, the Viceroy admitted that the competition from there was growing and was affecting the imports from England more than the Indian mills. He believed that the prices of Japanese goods depressed the prices of Indian cloth, but there was no definite charge that Japanese goods were being dumped on India.
If the millowners could supply the necessary evidence to substantiate the charge, the Government would

consider the proposition.

The keenness of the disappointment caused by the Viceroy's refusal to take any immediate action to relieve the crisis may be gauged from the remarks made by N. N. Wadia, who had headed the deputation, at the conclusion of the Viceroy's reply. \* Mr. Wadia said that, since the Government of India had failed to do justice to an Indian industry, it would have to seek it elsewhere. He would, he added, proceed to England to move the Manchester Chamber of Commerce and labor unloss to realize Commerce and labor unions to realize the gravity of the situation, so that Lancashire and Bombay might jointly press the Government of India o give relief to the Indian textile in-

BELL OF CANADA BONDS The syndicate headed by Lee. Higginson & Co., Royal Securities Company, Ltd., and Harris. Forbes & Co., Inc., which offered an additional issue of \$5,000,000 Bell Telephone Company of Canada first mortgage \$ per, cent bonds, Series A, due March I. 1955, state that the bords have all been sold.

AMERICAN LINEN COMPANY FALL RIVER, Mass. Oct. 12 (Spetial)—James W. Anthony, for the last four years treasurer of the American Linen Company, has tendered his resignation but has signified a willingness or remain until the annual meeting, scheduled for Nov. 4, when a successor will be elected.

### **EDITORIALS**

There are many ways of establishing friendlier relations between the peoples, but it is to be doubted whether there

Cultural Contacts Aid Peace is any better way than that of cultural contacts. Economic agreements may well pave the way for political rapprochements, but intellectual exchanges may be still more fruitful of results.

It would be wrong, perhaps, to exalt one method at the expense of another. They are complementary, and indeed depend upon each other. Political cordiality, economic solidarity, are in themselves not enough; there should also be encouraged the closest possible understanding, something which can only be achieved if one nation knows what another is doing in the realm of art, of philosophy, and of physical science, M. de Monzie, the French Education Minister, recognized this axiom, and while his colleagues were endeavoring to conclude accords in the shape of security pacts and commercial treaties with Germany, he was occupied in discussions with his Berlin colleague, which would have the effect of bringing France and Germany into a community of intelligence.

To the same end the French are establishing in Paris an International Institute of Intellectual Co-operation, which will be a sort of clearing house for the élite of the world. It is certain that if the institute fulfills its purpose, it will accomplish a most important work, and one can only wish it well in its admirable task.

At the same time the French Government is endeavoring to stimulate its artistic and literary propaganda and to make known to other nations the most worthy productions of French civilization. In this connection the private initiative of Firmin Gémier, who is the director of the Odéon, the subsidized state theater which ranks only second to the Comédie Française, is to be particularly noted. He is desirous of establishing what he has called a League of Nations of the Theater. According to him, the association should meet periodically in full session, and there should be convoked all those who are concerned with modern drama. Every country would thus be aware of the best that was being done in every other country. In the execution of his project M. Gémier has turned, first of all, to Berlin. This is a remarkable fact which demonstrates that, although there is still much which separates the two great European countries which face each other across the Rhine. there is nevertheless a growing appreciation of each other on the common ground of art. In this domain there are no frontiers. If barriers exist, artificially created, they should be broken

In itself, perhaps, the present plan might be regarded as of no special importance, but taken in conjunction with other plans that are being prepared, it has a high significance. M. Gémier hopes to organize next summer a great international theatrical festival, which will unite the troupes and the techniciens of various countries, and he purposes to put at the disposal of foreign dramatists and players a studio, a theater and a lyric theater.

Each country which wishes to participate must promise to send representative companies to Paris for at least three successive years. This is a beginning, but it is anticipated that the

movement thus started will develop considerably.

If, therefore, one surveys the whole field and takes account of the convergent lines on which many people are working for the establishment of artistic and intellectual relations between the peoples, one will be persuaded that there is here most promising attempt to give to the peoples at present separated by mutual prejudices and by ignorance a better understanding of each With understanding there will come appreciation of each other's qualities and a less exacting regard for each other's defects. To understand all, it has been well said in a French proverb, is to forgive all. All those who are striving to forward fuller knowledge and to awaken warmer sympathies are to be commended, for, consciously or unconsciously, they are the true peacemakers of the world.

Again there is to be made an appeal to federal authority to supplement and make effective

Federal Curb on Pistols

an undertaking which it has been found next to impossible to accomplish through even the greatest effort of individual states. Local option, to apply the term in its broader sense, has many times been proved

ineffective in the effort to regulate or prohibit undesirable traffic among or between the states. Boundary lines which impose no physical barriers were found to be ineffective during the years when the people of the United States sought to regulate the traffic in intoxicating liquors according to the whim of the people of the several communities or the legislative ukase of the different states. The time came when it was realized that if the saloon was ever to be outlawed it must be by national. rather than local or community action.

Similarly it appears to have been shown that any effective regulation prohibiting the traffic in firearms must be imposed by federal authority. In some of the states, notably New York, it has been attempted to forbid, by legislative fiat, the sale of pistols and other similar weapons designed to be borne on the body. But experience has shown that evasion of these laws is not impossible. Now, under the ægis of a committee recently organized in New York City, an effort is to be made to induce Congress to enact and enforce a law making it illegal to convey pistols into any state which has forbidden the carrying of concealed weapons, or their possession, except as provided by law.

Those active in this campaign announce that they are proceeding upon the theory that further delay is unnecessary in completing a national survey of conditions or in compiling tables of statistics showing the number of offenses committed by persons illegally in pos-session of forbidden weapons. Sufficient knowledge of the prevalence of such crimes has already been gained. It is proposed now to take the next and only logical step, as the organizers of the committee see it.

One wonders if there will appear, in some form or another, under the sponsorship of those who pretend to make their appeal in the name of individual freedom, an organization which might properly assume a name such as the Association Against the Anti-Pistol-Carrying Law. It might quite logically follow, if those who assume the privilege of violating and nullifying the law prohibiting the manufacture and sale of intoxicating liquors, forbidden by the fundamental law of the land, have the effrontery to parade their lawlessness publicly, that the defenders of highwaymen, bank robbers and housebreakers might with impunity oppose the enactment of a law designed to safeguard and protect human life. Personal liberty, they may well insist, is a sacred heritage.

While in the United States the President is permitted to address the public on any subject

A King's Right to Free Speech

he chooses and is free to express whatever opinions he may harbor without other barriers than those set up by his own judgment, the European. kings are not so unrestrained. In both Italy and Spain the sovereigns

live under the censorships of dictators, like all their fellow nationals, and under parliamentary governments the powers of the constitutional monarchs of other Old World kingdoms are hardly less circumscribed.

In England it has long been a recognized practice for the King to have his address from the throne at the opening of Parliament prepared by whatever Cabinet happens to be in power. If it is Liberal, the King's address reflects the Liberal attitude; and if it is Conservative, his words summarize that party's tenets. In the small European kingdoms the governmental systems of which are modeled more or less closely upon the British, the situation is about the same. The kings reign, but do not govern, and all their decrees must be countersigned by a responsible cabinet member. In their public utterances they must be careful not to say anything that runs counter to the policies of the government chosen by the popularly elected parliaments. If they exceed the bounds of discretion they are promptly called to order.

A case in point has just come up in Sweden. There, until quite recently, the King retained a number of traditional prerogatives. Among these was his ancient right, as commander-inchief of the military forces, to address the citizens directly on matters concerning the national defense. After having lain dormant for several decades, this privilege was tested out in the spring of 1914. As a measure of agitation against the Liberal Government, the Conservative Opposition then organized a demonstration by peasants at the royal castle, and by prearrangement the King addressed these visitors in favor of better military preparedness. His speech had not been submitted to the Govern-

ment, and the next day it resigned in protest. The outbreak of the World War complicated the situation and there was no clear-cut decision by popular vote. Now a similar situation has arisen. By the combined votes of the Social-Democrats and the People's Party, as well as of many Liberals, it was decided last spring to reorganize the army and to discontinue many old regiments, particularly those of cavalry, for which aviation was substituted as an independent arm. Some of those regiments were over 300 years old and at the dissolution ceremonies of one of them, the Smaaland Hussars, which Gustavus Adolphus commanded in person at the battle of Lützen in the Thirty Years War, the present King, Gustav V, permitted himself to express regrets at the legislative decision

and to voice hopes for "better times. This was well in accord with the Conservative sentiments of the officers present, but the next day he was taken severely to task, not only by the governmental Social Democratic organs, but also by those of the People's Party. He was told that while he was entitled to entertain personal opinions on questions of public policy, he had no right to express them in public; that having countersigned the law he was bound by it, like everyone else. While he is not likely to suffer any official censure, his personal prestige being considerable, he is not in a position to make any change in the

It may be recalled that Hamlet once said, 'Speak the speech, I pray you, as I pronounc'd

The Annual Town Criers' Contest

it to you, trippingly on the tongue, but if you mouth it, as many of your players do, I had as lief the town crier spoke my lines." And if one may draw conclusion from the competitors in the recent contest of

town criers, held annually at or near Pewsey, Eng., he had reason for his plea, for one reads that this year's champion had a voice like a mountain torrent! This competition is open to criers from all parts of the United Kingdom, and is in fact designed to find out which of them all has the loudest and clearest voice.

There are many quaint ceremonies observed in England that have their origin in the Middle Ages, and they all have their individual beauties and points of interest, but it is questionable whether any one of them can vie with the colorful activities of this town-crier championship. This year, for instance, no less than seventeen contestants, arrayed in the distinctive and grand trappings of their ancient craft, presented a unique array. And their setting in the little village of Old World atmosphere gave to the picture an air of reality that seemed to bring back the centuries long since past.

It was noticed in this contest, which by the way was said by those who have followed the event for years to have been the best that has yet been held, that the largest voice did not by any means go with the largest man, some of the contestants with the most astonishing powers-both as to volume and clarity of tone being comparatively small in physique. One

competitor, it is said, claimed to have a voice which could be heard for seven miles, but perhaps he lacked the clearness demanded by the judges, for he did not win the prize, which went to a man who defeated even the previous champion. Seldom, say the inhabitants of Pewsey, have they enjoyed such ear-splitting cries or have the flat stretches of Salisbury Plain resounded to a greater variety of farflung vocal tones.

The formula prescribed in this championship contest, in practicing for which the competitors have been training for months in various sections of the land, was specially constructed of words difficult to pronounce distinctly enough to be heard by the judges who occupied a tent several hundred yards away. This is what each contestant had to ring out in clarion accents:

Oyez! Oyez! Oyez! All found at Pewsey and District Oyez: Oyez: Oyez: All found at rewsey and District Carnival, biggest and brightest spectacle in the south and west of England. A week of revelry and pageantry. A procession of stupendous proportions passing through scenes of fairyland amid a blaze of brilliant illumination. God save the King!

It did not remain for the Dixie Highway, that broad and picturesque roadway extending from

Along the

New Dixie

Highway

Sault Ste. Marie, Mich., to the southern tip of Florida, to bring culture and opportunity to the south. Yet the completion of the great boulevard through the mountain sections of Ken-

tucky has completed a new link which unites in added friendly bonds once widely separated sections of the United States. In this picturesque hilly portion of the Blue Grass State the Dixie Highway passes along what, but recently, were mere bridle paths and foot trails through brush and trees. These passes, so-called, were not available for ordinary travel. A speaker at the banquet which was held to celebrate the completion of the highway explained that in some cases a traveler was obliged to journey nearly two hundred miles by rail around the base of a mountain in order to reach a point a little more than a dozen miles distant, as the crow flies, from the starting point.

The same speaker drew an entertaining and interesting picture of this section of Kentucky as it existed until recently. He said:

Imagine a country where vehicles were unknown; where it was no uncommon sight to see a woman astride a mule, a sack of corn across the saddle pommel, a baby on one arm and a basket on the other; where schools, when they existed, were reached by children only after a tramp of miles through a wilderness but little changed since the days when Daniel Boone passed through the Cumberland Gap.

As the motorcade passes through these sections in the next few days, those of us who take part in this long motor trip of celebration will ride over hard-surfaced roads and, in the towns and villages, will be greeted from their "flivvers" by the same women who, a few years ago, had never seen a wheeled vehicle of any sort, much less a motorcar.

In the educational and sociological advantages which the Dixie Highway will bring to communities of this sort, it will more than justify the millions of dollars which have gone into its constructio

Those who may be inclined at times to be impatient or resentful because of the traffic congestion encountered in and near the larger cities, should endeavor to gain a mental picture of the transformation of these less progressive neighborhoods, not alone in the Kentucky mountains, but in almost numberless sections of the world, wrought since the advent of the motorcar. There is no greater civilizer than the understanding which is gained by friendly and constant contact between those who have been backward or have remained ignorant, and those who have progressed in the realization of right ideas.

Along the Dixie Highway, almost from one end to another, there has been spread out an interesting and pleasing panorama. For centuries, no doubt, travelers will enjoy these beauties and mark the characteristic differences between the people and industries of the north and those of the south. With the passing of the years these differences will grow less and less and become hardly noticeable as the social and commercial strata blend and mingle. Even the mountaineers in the emancipated regions along the route will emerge, in broader and broader areas, from the seclusion which bound them before the winding asphalt payement straightened the curves and leveled the steep grades in their rugged hill pathways.

#### Editorial Notes

The Fascist newspapers have given full credit to Fascismo for the new Metropolitan branch railway from Naples to Rome, and why should they not? For it certainly appears to be a piece of construction of which all who were concerned in its building can be proud. Anyhow, the new line should be a great boon to Neapolitans, who have in the past been forced to waste hours every week waiting at street corners for the street cars covering the same territory. The entire equipment is of the very latest type, and even includes escalators where these have been judged necessary. These latter, by the way, have provoked much merriment and delight, being like a new toy in the hands of a child. Allowing for stops, of which there are seven, the trip takes slightly more than half an hour, and trains run every fifteen minutes. Neapolitans will have none but themselves to blame if they do not make this railway a model for a lot of others.

In issuing his latest warning to operators of automobiles, Frank A. Goodwin, registrar of motor vehicles in Massachusetts, is performing a public service by calling attention to several of the outstanding faults which every automobilist should conscientiously and persistently avoid. He urges, for example, that motorists shall not drive after taking a drink of liquor, that they shall not drive faster than conditions warrant, that they shall not attempt to pass a number of cars ahead of them, as they may be forced by oncoming traffic to "cut in," and that they shall not speed by intersecting streets. In a word, every motorist, when tempted to indulge in any of those vagaries of the road which have caused so many mishaps, had better call to mind and act upon Punch's advice to those about to get married, "Don't."

#### Temperance Sentiment in Scotland

"A gentleman to see you." said a voice, and in walked one of our leading temperance workers and incidentally one of the city's councilors. I greeted him, perhaps less cordially than usual, as I had just returned from a local magnates. He only interviewed me in the glare

less cordially than usual, as I had just returned from a hard day's work in the country.

He was not long in making known the object of his visit. Would I help in getting signatures for a requisition for a poll under the Temperance Act. I thought deeply—but only for a minute—then my thoughts went to dry America, which I had seen, and to dry Scotland which I hoped to see. Was I not working most days from early to late—but surely I could not refuse his appeal. The requisition was for a rural area where no poll had ever been held. I accepted—and a list of voters in an outlying part was put in my hands.

The time available for the work was short, so on the first opportunity I set off on my bicycle accompanied by Kiltie. Kiltie is a very thoughtful Cairn terrier and he views local option with approval, especially when it means visits to farmyards.

means visits to farmyards.

We were armed with a very impressive looking document which said: "We, the subscribers hereto, being Electors in No. XLI ward of the City of Edinburgh, do hereby demand a Poll under the terms of the Temperance (Scotland) Act 1913." Kiltie and I knew that 10 per cent of the electors must sait for a poll before one per cent of the electorate must ask for a poll before one could be held, so we sped forth with high hopes.

4 4 4 At the first farm we were sternly received by an old lady who apparently doubted our mission. "Is it temperance?" she asked, "for I believe in temperance." It was to that end a poll was being saked for, I told her, and she seemed satisfied. She took away the form, and fifteen minutes elapsed before she and her daughter completed their part on it.

their part on it.

Meanwhile the daylight was departing. Pushing on Meanwhile the daylight was departing. "Na, na," he said, "I'll no sign. I believe in takin' the drink when I want it and leavin' it when I don't." His handsome but gloomy-looking wife apparently agreed with him, and chased Kiltie out of her door through which he had been straying.

local magnates. He only interviewed me in the glare of electric light on his veranda and advised me to let sleeping dogs lie. No, he would not sign. His wife? Oh, she voted as he told her. "I can hardly believe that," said I. "Neither can I," said he. We parted amiably, and he watched to see that I reached his gate in the dark.

The next evening we set off again. The sun was dropping—a great red ball—behind the purple hills. A few stars were out in the clear sky and a harvest mooth was making its appearance. Some of the fields were cleared, and in others they had just left off "leading." At the farm cottages of a large and prosperous farm 1 was well received.

An old woman said, "Aye, I'll sign, but I'll no be able gang to vote." "Never mind," I assured her, "every to gang to vote.' little helps." After that she warmed to the job and constituted herself my guide. "Aye," she said. "The Howdens have left here, but the Lumsdens are in. Next door to them ye'll find the Blairs." The Lumsdens signed willingly and supplied more information, and so on, to end of the row.

A married woman who was under thirty and so had A married woman who was under thirty and so had no vote asked me if I thought it fair that boys of twenty-one should vote and she—a married woman—should not. I did not—and said so. The grieve's wife was also under thirty and so penalized for her youth. She offered to sign for her husband, as he was out. That could not be, so I was told he was seeing the "maister", and I might get him at "the hig hoose." get him at "the big hoose."

The "maister" proved a real ally and not only signed but engaged in a hunt for the missing grieve. I was cordially invited into the house by an evidently sympathetic maid, and when I elected to remain on the doorstep with Kitie, sine called her employer and returned to help me with directions.

On we went to an old will god found all the

On we went to an old mill, and found all there anxious On we went to an old mill, and tound all there anxious to do what they could. On the return journey the grieve's young wife asked us in to her spotless kitchen to wait for her husband and his signature.

Everything was clean and shining, and the baby and kiltle evidently liked each other. The young wife and I

with him, and chased Kiltie out of her door through which he had been straying.

A dairy farmer was our next catch—he was delighted to ask for a poll, and there was no doubt as to which option he would favor. Off he went with my requisition form, and I sat in the shadow of the old castle and waited—Kiltie seemed to be enjoying the company in the farmyard. By and by, back came the farmer with his signature and that of his wife and one of his men. His brother was out or, he, too, would have

### The World's Great Capitals: The Week in Moscow

Moscow, Oct. 12 Twenty-three members of the Japanese delegation are in Moscow to participate in the railroad conference which opens here today. The head of the delegation, the Transport Minister, Mr. Olta, declared that the purpose of the conference was the re-establishment of direct railroad communication between Russia and Japan, which would shorten the time necessary to travel between Tokyo and London from fifty days to fifteen

The All-Union automobile test, which was conducted recently, resulted in a German car, the Mercedes, being the first to reach Moscow, with a Fiat machine second and a Packard third. Buick and Studebaker cars received good ratings, in the endurance and durability tests. While no final decisions have been reached it seems that the Russian judges of the contest came to the conclusion that European cars could be operated with more economy. and that only the heavier makes of American cars are suitable for importation,

A delegation of the British Parliamentary Labor Party, headed by R. C. Wallhead and including Mardy Jones, G. H. Hall and D. R. Grenfell, arrived in Moscow some time ago for the purpose of studying Russian economic conditions and investigating the possibilities of enlarging the commercial contacts between the Soviet and Great Britain. The delegation planned to spend from a month to six weeks in Russia. 4 4 4

City dwellers probably live better than country folk in every country; but an especially striking discrepancy between urban and rural standards of living in Russia is indicated in a set of figures recently published in the newspaper "Economic Life." These figures refer to the prospective consumption of goods in the Soviet Union during the coming year. The figures show that the averduring the coming year. The figures show that the average allowance of textile goods is less than eight yards perperson in the country districts and about thirty-five yards per person in the cities. The peasant's yearly ration of sugar is eight pounds; the city dweller's forty-eight. While five city dwellers use up four pairs of leather shoes, there is only one pair of leather shoes for every five peasants. Although there is naturally much more use of electric lighting in the cities than in the villages, the city dweller consumes twice as much villages, the city dweller consumes twice as much kerosene as the peasant.

In connection with the celebration of the two-hundredth anniversary of the founding of the Russian Academy of Natural Science a Soviet motion picture company is making a film designed to show the develop ment of the academy from the period of its establishment to the present time. The film will show Tsar Peter the Great signing the decree for the establishment of the academy; Lomonosov, the famous pioneer of natural science in Russia, working in his laboratory; the first Russian expeditions to Siberia in 1749 and other episodes in the history of the academy. At the present time, in addition to many smaller expeditions, the academy has two large natural scientific expeditions in the field exoloring the little known natural resources of Yakutia, a sparsely populated republic with seven times the area of France, located in Northern Siberia, and Outer Mongolia, a huge country two-thirds as large as the United States, which although nominally under the sovereignty of China, has established close relations with the Soviet Union.

The big Putilov metal plant in Leningrad is now manufacturing Fordson tractors. It is estimated that 1200 will be built during the current year. There is a considerable demand for tractors from the Russian peasant; but the costs of tractor production in the Putilov plant are exceedingly high; and the Government is attempting to bring these machines within the reach of the peasants by importing the cheaper foreign tractors and then selling all the tractors at a price somewhere hetween the Russian and foreign cost. It is estimated that next year 10,380 tractors will be imported and 2790 produced in the Russian factories. The demand for tractors this year has reached the figure of 20,000. 4 4 4

The Livadian Palace in the Crimea, formerly the summer residence of the Tsars, has new been turned into a peasants' rest home; but some of the historical rooms have been preserved intact and cast an interesting light upon the character and tastes of the last two Tsars, Alexander III and Nicholas II. The library of Tsar Nicholas II reveals little taste for serious reading. It contains no books on politics, economics or philosophy and is chiefly given over to light French novels and stories of court ceremonies and festivities, such as "The Coronation of Katherine II" and "The Everyday Life of Russian Emperors and Empresses."

4. 4 4 A recent report on the status of labor protection in the Russian factories and mines helps to illustrate the extent to which the Soviet labor legislation is carried out in practice. The workers in the Soviet Union enjoy a statutory eight-hour day, with a six-hour day for occupations regarded as harmful and hazardous, such as mining. It seems that about a seventh of the workers (14.4 per cent) work overtime. This overtime work is especially prevalent in the metal plants of southern Russia and the Urals, where bad housing conditions are

Russia and the Urals, where bad housing conditions are a factor in preventing the employment of a sufficient number of workers to operate on an eight-hours basis.

The eight-hour day is also often disregarded in seasonal occupations, such as fishing and lumber and agricultural work. It seems that the number of accidents in Russian industry is increasing, as a result of two featers: the introduction of the pleasure system of payment, which makes the receives so little and the

duction that they neglect safety devices, and the em-ployment of numbers of new inexperienced workers be-cause of the expansion of the industries. The report uiges that more attention be paid to the problems of labor protection, since the industries have now become rich enough to afford renovations and improvements which could not be carried out in earlier years.

#### Letters to the Editor

Brief communications are velocized, but the editor must remain sole fudge of their spitability, and he does not undertake to hold himself or this newspaper responsible for the facts or opinions presented. Anony-mous letters are destroped unreads:

#### Learning the Lessons of the World War To the Editor of THE CHRISTIAN SCIENCE MONITOR:

The fact that the War Memoirs of Viscount Grey seem fo establish the plea that the ex-Kaiser and the German people were not solely responsible for the World War, as usually believed, is of interest, but should not be allowed to serve as a cloak to cover the higher lessons in wisdom which future nations and peoples would do well to learn irrevocably. Inde. 1, without these nothing is gained by the decision as to who was, or was not, responsible.

It is well established that Germany's continuous policy from the commencement of the ex-Kaiser's reign was one of increasing militarism, intrigues with other countries aiming toward German world-dominion, and an absorbing education of their young to regard German intellects and German "culture" as superior to all others, -in short, it amounted almost to a national religion! Such a condition of aggressive thought, which entirely ruled the nation with an autocracy under which the people as a whole were lulled to sleep, cannot fail, wherever it may appear, to be responsible for future

The German Nation today may be more the victor than some of the so-called conquerors, if, through an awakened national conscience, its people are freed, by the defeat of military dominance, which led them blindly to believe in their self-sufficiency; whilst others may with profit look to their own methods and aspirations these same errors and reap their inevitable results. The time surely has come for the great-little family

world to shake down together, and recognizing past, learning from those mistakes common to all, the impersonal nature of the universal foe-evil! Thus only can we gain the wisdom to be of help to each other and to inaugurate a brotherhood in which all hands are joined in the consecrated effort to establish freedom based on justice and good will.

#### "Overcoming Bigotry and Superstition"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: The gratifying report of the British and Foreign Bible Society which you comment on in your recent editorial in the Monitor under the caption, "Overcoming Bigotry and Superstition," reminds me of the interesting work accomplished by George Henry Borrow, when he was employed as both translator and colportent by that

You tell of the interest in the Scriptures in China and the exclusion of Bibles from Russia. It was in 1835 that Mr. Borrow finished his translation of the New Testament into the court language of China. It is striking that the work of translating and printing was done Mr. Borrow spoke of the cordial reception and good treatment he experienced during his three years' work in He wrote to the society offering to travel by way of

Lake Baikal across the immense continent to distribute the bulky works in China. He was stopped by what he called Russian "red tapeism" and his mother's fears. One of the Bible Society's officials referred to the edition Mr. Borrow had completed as "so much seed in the granary which 'it is not written shall be sown' yet."-Those New Testaments in the intricate Manchu-Tartar

characters were afterward distributed and one cannot help speculating as to where the volumes are now, ninety years later, and to what extent they fell on "good

Also I cannot help wondering how much less supersti-tion and how much more freedom and democracy might be in Russia and China today if past generations in those countries had had the advantage of the Scriptures. London, Ont., Can. M. T.

#### Assaying the Work of the League Assembly

To the Editor of THE CHRISTIAN SCIENCE MONITOR: In assaying the work of the League of Nations Assembly, the manner of approach largely determines the estimate of its operations. Prejudice in its favor discounts obstacles; prejudice against it sees only the

A fair hearing and a free opportunity to prove itself are suggested by its accomplishments. An insidiscredited is an institution already on the skids

Neither its avowed enemies nor its enamoured friends can afford to ignore possibilities of co-operation in tak-ing the profits out of war, or confounding the prophets

of war's inevitability.

The will to believe coupled with the willingness to do is a well-nigh irresistible combination.

The possible and the impossible in social achievement are relative terms where value derives transitive terms where value derives transitive terms.
